Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-006

Order: 93877
Page: 29 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-03 (9-10)	Chain of Custody: 183699
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:45

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93877-006A **Matrix: Soil/Solid**
Description: SB-03 (9-10)

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-008

Order: 93877
 Page: 39 of 189
 Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-04 (8-9)	Chain of Custody: 183699
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 10:05

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-008A** Matrix: **Soil/Solid**
 Description: **SB-04 (8-9)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-010

Order: 93877
Page: 49 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-05 (14-15)	Chain of Custody: 183699
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 11:30

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-010A** Matrix: **Soil/Solid**
Description: **SB-05 (14-15)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-012

Order: 93877
Page: 59 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-06 (4-5)	Chain of Custody: 183698
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 13:30

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-012A** Matrix: **Soil/Solid**
Description: **SB-06 (4-5)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-017

Order: 93877
 Page: 84 of 189
 Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-09 (1-2)	Chain of Custody: 183698
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/22/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 07:45

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-017A** Matrix: **Soil/Solid**
 Description: **SB-09 (1-2)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-025

Order: 93877
 Page: 121 of 189
 Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-12 (0-1)	Chain of Custody: 183687
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/22/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 10:30

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-025A** Matrix: **Soil/Solid**
 Description: **SB-12 (0-1)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-027

Order: 93877
Page: 131 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-13 (4-5)	Chain of Custody: 183687
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/22/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 11:55

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-027A** Matrix: **Soil/Solid**
Description: **SB-13 (4-5)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-029

Order: 93877
Page: 141 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-14 (1-2)	Chain of Custody: 183687
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/22/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 12:15

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93877-029A** Matrix: **Soil/Solid**
Description: **SB-14 (1-2)**

Analytical Laboratory Report
Laboratory Project Number: 93877
Laboratory Sample Number: 93877-038

Order: 93877
Page: 185 of 189
Date: 12/09/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: DUP-01	Chain of Custody: N/A
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 12:00

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93877-038A **Matrix: Soil/Solid**
Description: DUP-01

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- E1** : The reported value is estimated due to the presence of interference.
- G+** : Recovery of the associated Surrogate Compound exceeds the upper control limit. Results may be biased high.
- H** : Hold time exceeded.
- L-** : Recovery in the associated laboratory sample (LCS) exceeds the lower control limit. Results may be biased low.
- L+** : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.
- Y1** : Sample was diluted due to a sample matrix issue.

Analysis Locations:

All analyses performed in Holt.

Fibertec Project Number: 93935
Project Identification: DDOT Coolidge /
Submittal Date: 11/26/2019

Mr. Dan McNeely
DLZ Michigan, Inc. - Lansing
1425 Keystone Avenue
Lansing, MI 48911

Dear Mr. McNeely,

Thank you for selecting Fibertec Environmental Services as your analytical laboratory. The samples you submitted have been analyzed in accordance with NELAC standards and the results compiled in the attached report. Any exceptions to NELAC compliance are noted in the report. These results apply only to those samples submitted. Please note TO-15 samples will be disposed of 7 calendar days after the reporting date. All other samples will be disposed of 30 days after the reporting date.

If you have any questions regarding these results or if we may be of further assistance to you, please contact me at (517) 699-0345.

Sincerely,

By Sharon Rakow at 12:15 PM, Dec 12, 2019

For Daryl P. Strandbergh
Laboratory Director

Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-18 (4-5)	Chain of Custody: 183685
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 08:00

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-002A **Matrix: Soil/Solid**
Description: SB-18 (4-5)

Parameter(s)	Result	Q	Units	Reporting Limit	Dilution	Preparation		Analysis		
						P. Date	P. Batch	A. Date	A. Batch	Init.
38. Isopropylbenzene	U		µg/kg	250	1.0	12/04/19	VI19L04B	12/05/19	VI19L04B	JMF

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-004

Order: 93935
 Page: 19 of 262
 Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-19 (14-15)	Chain of Custody: 183685
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 08:20

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93935-004A** Matrix: **Soil/Solid**
 Description: **SB-19 (14-15)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-007

Order: 93935
Page: 34 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-21 (4-5)	Chain of Custody: 183685
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:40

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035 Aliquot ID: **93935-007A** Matrix: **Soil/Solid**
Method: EPA 5035A/EPA 8260D Description: **SB-21 (4-5)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-009

Order: 93935
Page: 44 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-22 (1-2)	Chain of Custody: 183685
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 10:20

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93935-009A** Matrix: **Soil/Solid**
Description: **SB-22 (1-2)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-011

Order: 93935
Page: 54 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-23 (4-5)	Chain of Custody: 183691
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 10:55

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-011A **Matrix: Soil/Solid**
Description: SB-23 (4-5)

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-013

Order: 93935
 Page: 64 of 262
 Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-24 (1-2)	Chain of Custody: 183691
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 12:20

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93935-013A** Matrix: **Soil/Solid**
 Description: **SB-24 (1-2)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-015

Order: 93935
Page: 74 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-25 (5-6)	Chain of Custody: 183691
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 13:25

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-015A **Matrix: Soil/Solid**
Description: SB-25 (5-6)

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-017

Order: 93935
 Page: 84 of 262
 Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-26 (4-5)	Chain of Custody: 183691
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 13:55

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035 Aliquot ID: **93935-017A** Matrix: **Soil/Solid**
 Method: **EPA 5035A/EPA 8260D** Description: **SB-26 (4-5)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-019

Order: 93935
 Page: 94 of 262
 Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-27 (3-4)	Chain of Custody: 183691
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 14:25

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035 Aliquot ID: **93935-019A** Matrix: **Soil/Solid**
 Method: **EPA 5035A/EPA 8260D** Description: **SB-27 (3-4)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-021

Order: 93935
Page: 104 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-28 (4-5)	Chain of Custody: 183696
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 15:10

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-021A **Matrix: Soil/Solid**
Description: SB-28 (4-5)

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-023

Order: 93935
Page: 114 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-29 (3-4)	Chain of Custody: 183730
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 07:55

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-023A **Matrix: Soil/Solid**
Description: SB-29 (3-4)

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-026

Order: 93935
Page: 128 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-30 (4-5)	Chain of Custody: 183730
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 08:30

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-026A **Matrix: Soil/Solid**
Description: SB-30 (4-5)

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-028

Order: 93935
Page: 139 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-31 (6-7)	Chain of Custody: 183730
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:05

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035 Aliquot ID: **93935-028A** Matrix: **Soil/Solid**
Method: EPA 5035A/EPA 8260D Description: **SB-31 (6-7)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-030

Order: 93935
Page: 149 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-32 (12-13)	Chain of Custody: 183730
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:35

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035 Aliquot ID: **93935-030A** Matrix: **Soil/Solid**
Method: EPA 5035A/EPA 8260D Description: **SB-32 (12-13)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-032

Order: 93935
 Page: 159 of 262
 Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-33 (3-4)	Chain of Custody: 183688
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:55

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93935-032A** Matrix: **Soil/Solid**
 Description: **SB-33 (3-4)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-034

Order: 93935
Page: 169 of 262
Date: 12/12/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-34 (1-2)	Chain of Custody: 183688
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 10:45

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93935-034A** Matrix: **Soil/Solid**
Description: **SB-34 (1-2)**

Analytical Laboratory Report
Laboratory Project Number: 93935
Laboratory Sample Number: 93935-038

Order: 93935
 Page: 189 of 262
 Date: 12/12/19

Client Identification: **DLZ Michigan, Inc. - Lansing** Sample Description: **SB-36 (3-4)** Chain of Custody: **183688**
 Client Project Name: **DDOT Coolidge** Sample No: Collect Date: **11/26/19**
 Client Project No: **NA** Sample Matrix: **Soil/Solid** Collect Time: **11:55**

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: 93935-038A **Matrix: Soil/Solid**
Description: SB-36 (3-4)

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- *** : Duplicate analysis not within control limits.
- E1** : The reported value is estimated due to the presence of interference.
- F-** : Recovery from the spiked aliquot exceeds the lower control limit (matrix spike or matrix spike duplicate).
- F+** : Recovery from the spiked aliquot exceeds the upper control limit (matrix spike or matrix spike duplicate).
- G+** : Recovery of the associated Surrogate Compound exceeds the upper control limit. Results may be biased high.
- J+** : The result is an estimated quantity, but the result may be biased high.
- L+** : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.
- V+** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the upper control limit. Results may be biased high.
- Y1** : Sample was diluted due to a sample matrix issue.

Analysis Locations:

All analyses performed in Holt.

Mr. Dan McNeely
DLZ Michigan, Inc. - Lansing
1425 Keystone Avenue
Lansing, MI 48911

Dear Mr. McNeely,

Thank you for selecting Fibertec Environmental Services as your analytical laboratory. The samples you submitted have been analyzed in accordance with NELAC standards and the results compiled in the attached report. Any exceptions to NELAC compliance are noted in the report. These results apply only to those samples submitted. Please note TO-15 samples will be disposed of 7 calendar days after the reporting date. All other samples will be disposed of 30 days after the reporting date.

If you have any questions regarding these results or if we may be of further assistance to you, please contact me at (517) 699-0345.

Sincerely,

By Rikki Lott at 4:35 PM, Dec 06, 2019

For Daryl P. Strandbergh
Laboratory Director

Analytical Laboratory Report
Laboratory Project Number: 93892
Laboratory Sample Number: 93892-002

Order: 93892
Page: 9 of 37
Date: 12/06/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-05 (0-2 Comp)	Chain of Custody: 183697
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/21/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 11:25

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93892-002A** Matrix: **Soil/Solid**
Description: **SB-05 (0-2 Comp)**

Analytical Laboratory Report
Laboratory Project Number: 93892
Laboratory Sample Number: 93892-004

Order: 93892
Page: 19 of 37
Date: 12/06/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-09 (0-2 Comp)	Chain of Custody: 183697
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/22/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 07:50

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93892-004A** Matrix: **Soil/Solid**
Description: **SB-09 (0-2 Comp)**

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- Y1** :
- E1** : The reported value is estimated due to the presence of interference.
- F+** : Recovery from the spiked aliquot exceeds the upper control limit (matrix spike or matrix spike duplicate).
- G+** : Recovery of the associated Surrogate Compound exceeds the upper control limit. Results may be biased high.
- L+** : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.
- V+** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the upper control limit. Results may be biased high.
- Y1** : Sample was diluted due to a sample matrix issue.

Analytical Laboratory Report
Laboratory Project Number: 93946
Laboratory Sample Number: 93946-001

Order: 93946
Page: 4 of 32
Date: 12/10/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: SB-32 (0-2 Comp)	Chain of Custody: 183694
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/26/19
Client Project No: NA	Sample Matrix: Soil/Solid	Collect Time: 09:25

Sample Comments: **Soil results have been calculated and reported on a dry weight basis unless otherwise noted.**

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS, 5035
Method: EPA 5035A/EPA 8260D

Aliquot ID: **93946-001A** Matrix: **Soil/Solid**
Description: **SB-32 (0-2 Comp)**

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- E1** : The reported value is estimated due to the presence of interference.
- G+** : Recovery of the associated Surrogate Compound exceeds the upper control limit. Results may be biased high.
- L+** : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.
- V+** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the upper control limit. Results may be biased high.
- Y1** : Sample was diluted due to a sample matrix issue.

Analysis Locations:

All analyses performed in Holt.

Mr. Dan McNeely
DLZ Michigan, Inc. - Lansing
1425 Keystone Avenue
Lansing, MI 48911

Dear Mr. McNeely,

Thank you for selecting Fibertec Environmental Services as your analytical laboratory. The samples you submitted have been analyzed in accordance with NELAC standards and the results compiled in the attached report. Any exceptions to NELAC compliance are noted in the report. These results apply only to those samples submitted. Please note TO-15 samples will be disposed of 7 calendar days after the reporting date. All other samples will be disposed of 30 days after the reporting date.

If you have any questions regarding these results or if we may be of further assistance to you, please contact me at (517) 699-0345.

Sincerely,

By Sharon Rakow at 4:12 PM, Dec 10, 2019

For Daryl P. Strandbergh
Laboratory Director

Analytical Laboratory Report
Laboratory Project Number: 93929
Laboratory Sample Number: 93929-003

Order: 93929
Page: 14 of 17
Date: 12/10/19

Client Identification: DLZ Michigan, Inc. - Lansing	Sample Description: TW-DUP	Chain of Custody: 183692
Client Project Name: DDOT Coolidge	Sample No:	Collect Date: 11/25/19
Client Project No: NA	Sample Matrix: Ground Water	Collect Time: 12:00

Sample Comments:

Definitions: Q: Qualifier (see definitions at end of report) NA: Not Applicable ‡: Parameter not included in NELAC Scope of Analysis.

Volatile Organic Compounds (VOCs) by GC/MS
Method: EPA 5030C/EPA 8260D

Aliquot ID: 93929-003B **Matrix: Ground Water**
Description: TW-DUP

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- H** : Hold time exceeded.
- L-** : Recovery in the associated laboratory sample (LCS) exceeds the lower control limit. Results may be biased low.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.
- V+** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the upper control limit. Results may be biased high.

Analysis Locations:

All analyses performed in Holt.

Fibertec Project Number: 93928
Project Identification: DDOT Coolidge /
Submittal Date: 11/26/2019

Mr. Dan McNeely
DLZ Michigan, Inc. - Lansing
1425 Keystone Avenue
Lansing, MI 48911

Dear Mr. McNeely,

Thank you for selecting Fibertec Environmental Services as your analytical laboratory. The samples you submitted have been analyzed in accordance with NELAC standards and the results compiled in the attached report. Any exceptions to NELAC compliance are noted in the report. These results apply only to those samples submitted. Please note TO-15 samples will be disposed of 7 calendar days after the reporting date. All other samples will be disposed of 30 days after the reporting date.

If you have any questions regarding these results or if we may be of further assistance to you, please contact me at (517) 699-0345.

Sincerely,

By Stephanie Wallace at 3:42 PM, Dec 09, 2019

For Daryl P. Strandbergh
Laboratory Director

Definitions/ Qualifiers:

- A:** Spike recovery or precision unusable due to dilution.
- B:** The analyte was detected in the associated method blank.
- E:** The analyte was detected at a concentration greater than the calibration range, therefore the result is estimated.
- J:** The concentration is an estimated value.
- M:** Modified Method
- U:** The analyte was not detected at or above the reporting limit.
- X:** Matrix Interference has resulted in a raised reporting limit or distorted result.
- W:** Results reported on a wet-weight basis.
- *:** Value reported is outside QC limits

Exception Summary:

- L+** : Recovery in the associated laboratory sample (LCS) exceeds the upper control limit. Results may be biased high.
- V-** : Recovery in the associated continuing calibration verification sample (CCV) exceeds the lower control limit. Results may be biased low.

Analysis Locations:

All analyses performed in Holt.

Re: **Coolidge Expansion**

Work Order: **22020012**

Dear Dan,

ALS Environmental received 15 samples on 31-Jan-2022 11:30 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 120.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Case Narrative

The attached "Sample Receipt Checklist" documents the date of receipt, status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. A copy of the laboratory's scope of accreditation is available upon request.

Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting.

Any flags on MS/MSD samples not addressed in this narrative are unrelated to samples in this report.

With the following exceptions, all sample analyses achieved analytical criteria.

Method VOC_8260_S, Sample 22020012-01A MSD: The RPD between the MS and MSD was outside of the control limit. The corresponding result should be considered estimated for this compound: diisopropyl ethane

Method SVO_8270_S, Sample 22020012-03B, 06B, 07B, 10B, 12B, 15B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020012-13B: reduced due to sample being black/potential microwave danger

Method PCBLVI_8082_S, Sample 22020012-15B: One or more surrogate recoveries were below the lower control limits. The sample results may be biased low. Decachlorobiphenyl-Surrogate out due to matrix interference.

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg	Milligrams per Kilogram

Re: **Coolidge Bus Terminal**

Work Order: **22020034**

Dear Dan,

ALS Environmental received 8 samples on 31-Jan-2022 11:30 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 33.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Electronically approved by: Julian Johnson

Case Narrative

The attached "Sample Receipt Checklist" documents the date of receipt, status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. A copy of the laboratory's scope of accreditation is available upon request.

Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting.

Any flags on MS/MSD samples not addressed in this narrative are unrelated to samples in this report.

With the following exceptions, all sample analyses achieved analytical criteria.

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Coolidge Biowales**

Work Order: **22020092**

Dear Dan,

ALS Environmental received 19 samples on 01-Feb-2022 11:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 125.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Work Order: 22020092

Case Narrative

Samples for the above noted Work Order were received on 2/1/2022. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Method VOC_8260_S, Sample 22020092-16A MSD: The RPD between the MS and MSD was outside of the control limit. The corresponding result should be considered estimated for this compound: 1,2,4-Trichlorobenzene

Method VOC_8260_S, Sample 22020092-03A MS: The MS recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: n-butylbenzene, sec-butybenzene

Method VOC_8260_S, Sample 22020092-03A MS: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: chloromethane, t-butanol

Method VOC_8260_S, Sample 22020092-03A MSD: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: chloromethane, t-butanol

Method VOC_8260_S, Sample 22020092-03A MSD: The MSD recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: n-butylbenzene, sec-butybenzene

Client: DLZ
Project: Coolidge Biowales
Work Order: 22020092

Case Narrative

Extractable Organics:

Method SVO_8270_S, Sample 22020092-03B MS: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: 2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol

Method SVO_8270_S, Sample 22020092-03B MSD: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: 2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol

Method SVO_8270_S, Sample 22020092-03B MSD: The RPD between the MS and MSD was outside of the control limit. The corresponding result should be considered estimated for this compound: Hexachlorocyclopentadiene

Method SVO_8270_S, Sample 22020092-04B: One or more of the surrogates were below the limits due to matrix interference 2,4,6-Tribromophenol; 2-Fluorophenol

Method SVO_8270_S, Sample 22020092-04B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-04B: Surrogate high due to matrix interference. Nitrobenzene-d5

Method SVO_8270_S, Sample 22020092-06B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-07B: reduced due to sample being black/potential microwave danger

Method SVO_8270_S, Sample 22020092-07B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-08B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-09B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-11B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-14B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Client: DLZ
Project: Coolidge Biowales
Work Order: 22020092

Case Narrative

Method SVO_8270_S, Sample 22020092-16B MS: The MS recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: 2,4-Dinitrophenol; 4,6-Dinitro-2-methylphenol

Method SVO_8270_S, Sample 22020092-16B MSD: The RPD between the MS and MSD was outside of the control limit. The corresponding result should be considered estimated for this compound: 4,6-Dinitro-2-methylphenol

Method SVO_8270_S, Sample 22020092-16B MSD: The MSD recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: 2,4-Dinitrophenol; 4,6-Dinitro-2-methylphenol

Method SVO_8270_S, Sample 22020092-17B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Method SVO_8270_S, Sample 22020092-19B: The reporting limit is elevated due to dilution needed to eliminate matrix-related interference.

Metals:

Note: The acceptability of internal standard recoveries has been reviewed for each sample by the analyst. All recoveries were found to be within the method specified criteria of > 70%, unless otherwise noted in this report.

Method ICP_6020_S, Sample 22020092-16BMS: The MS recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: K

Method ICP_6020_S, Sample 22020092-16BMSD: The MSD recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: K

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>

Re: **Coolidge Bioswales**

Work Order: **22020447**

Dear Dan,

ALS Environmental received 11 samples on 07-Feb-2022 11:00 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 68.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Case Narrative

Samples for the above noted Work Order were received on 2/7/22. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Method VOC_8260_S, Sample 22020447-01A: The reporting limit is elevated due to dilution for high concentrations of non-target analytes.

Method VOC_8260_S, Sample 22020447-02A: The reporting limit is elevated due to dilution for high concentrations of non-target analytes.

Method VOC_8260_S, Sample 22020447-03A: The reporting limit is elevated due to dilution for high concentrations of non-target analytes.

Method VOC_8260_S, Sample 22020447-11A: The Continuing Calibration Verification did not meet acceptance criteria with low bias. Instrument sensitivity was verified as sufficient through the analysis of a low-level standard. The following non-detects are reported without qualification: 4-methyl-2-pentanone, 2-butanone, 2-hexanone

No other deviations or anomalies were noted.

Extractable Organics:

Method SVO_8270_S, Sample 22020447-01B: Surrogate high due to matrix interference.

Method SVO_8270_S, Sample 22020447-01B: The reporting limits are elevated due to internal standard failure in the undiluted run for these analytes:

Client: DLZ
Project: Coolidge Bioswales
Work Order: 22020447

Case Narrative

Method SVO_8270_S, Sample 22020447-02B: Surrogate high due to matrix interference. Nitrobenzene-d5

Method SVO_8270_S, Sample 22020447-03B: Surrogate high due to matrix interference. Nitrobenzene-d5

Method SVO_8270_S, Sample 22020447-06B: Surrogate high due to matrix interference. Nitrobenzene-d5

Method SVO_8270_S, Sample 22020447-06B MS: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: Multiple compounds

Method SVO_8270_S, Sample 22020447-06B MSD: The MS recovery was below the lower control limit. The corresponding result in the parent sample may be biased low for this analyte: Multiple compounds

Method SVO_8270_S, Sample 22020447-07B: One or more of the surrogates were below the limits due to matrix interference 2,4,6-Tribromophenol; 2-Fluorobiphenyl; 4-Terphenyl-d14; Nitrobenzene-d5

Method SVO_8270_S, Sample 22020447-08B: One or more base/neutral surrogate recoveries were below the lower control limits. The base/neutral sample results may be biased low. 2-Fluorobiphenyl; 4-Terphenyl-d14; Nitrobenzene-d5

Method SVO_8270_S, Sample 22020447-08B: One or more acid surrogate recoveries were below the lower control limits. The acidic sample results may be biased low. 2,4,6-Tribromophenol

Method SVO_8270_S, Sample 22020447-10B: One or more base/neutral surrogate recoveries were below the lower control limits. The base/neutral sample results may be biased low. 4-Terphenyl-d14

No other deviations or anomalies were noted.

Metals:

Note: The acceptability of internal standard recoveries has been reviewed for each sample by the analyst. All recoveries were found to be within the method specified criteria of > 70%, unless otherwise noted in this report.

No other deviations or anomalies were noted.

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/Kg-dry	Micrograms per Kilogram Dry Weight
mg/Kg	Milligrams per Kilogram

Re: **Coolidge Bioswales**

Work Order: **22020094**

Dear Dan,

ALS Environmental received 8 samples on 01-Feb-2022 11:45 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 30.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **Coolidge Bioswales**

Work Order: **22020456**

Dear Dan,

ALS Environmental received 8 samples on 07-Feb-2022 11:00 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 30.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Electronically approved by: Julian Johnson

Case Narrative

The attached "Sample Receipt Checklist" documents the date of receipt, status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. A copy of the laboratory's scope of accreditation is available upon request.

Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting.

Any flags on MS/MSD samples not addressed in this narrative are unrelated to samples in this report.

With the following exceptions, all sample analyses achieved analytical criteria.

Method PCBLVI_8082_S, Sample 22020456-03A: One or more surrogate recoveries were below the lower control limits. The sample results may be biased low. Tetrachloro-m-xylene -Surrogate out due to matrix interference.

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
% of sample	Percent of Sample
µg/Kg	Micrograms per Kilogram
µg/L	Micrograms per Liter
mg/L	Milligrams per Liter

Re: **DDOT Coolidge (1942-6994-50)**

Work Order: **22020744**

Dear Dan,

ALS Environmental received 5 samples on 09-Feb-2022 11:00 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 60.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Julian Johnson

Electronically approved by: Julian Johnson

Case Narrative

Samples for the above noted Work Order were received on 2/9/2022. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Method VOC_8260_W, Sample 22020744-04A: The reporting limit is elevated due to dilution for high concentrations of non-target analytes.

Method VOC_8260_W, Sample 22020744-04A MS: The MS recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: 1,2,4-trimethylbenzene, naphthalene

Method VOC_8260_W, Sample 22020744-04A MSD: The MSD recovery was above the upper control limit. The corresponding result in the parent sample may be biased high for this analyte: 1,2,4-trimethylbenzene, naphthalene

Extractable Organics:

Method SVO_8270_WLL, Sample SLCSW1-191683: The LCS recovery was above the upper control limit. The sample results for this batch may be biased high for this analyte: 2-Methylnaphthalene; Fluoranthene; Naphthalene

No other deviations or anomalies were noted.

Client: DLZ
Project: DDOT Coolidge (1942-6994-50)
Work Order: 22020744

Case Narrative

Metals:

Note: The acceptability of internal standard recoveries has been reviewed for each sample by the analyst. All recoveries were found to be within the method specified criteria of > 70%, unless otherwise noted in this report.
No other deviations or anomalies were noted.

Wet Chemistry:

No other deviations or anomalies were noted.

Client: DLZ
Project: DDOT Coolidge (1942-6994-50)

**QUALIFIERS,
ACRONYMS, UNITS**

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

APPENDIX 10 Universal Waste and Potential Environmentally Sensitive Materials Summary

1.0 INTRODUCTION

DLZ Michigan, Inc. (DLZ) was retained by the Detroit Department of Transportation (DDOT) of Detroit, Michigan to conduct a survey for asbestos containing materials (ACM) and Universal Waste materials at the Coolidge Bus Terminal Facility (Subject Facility) located at 14044 Shaefer Road, Detroit, Michigan.

The Subject Facility consists of the Bus Garage Building, Terminal Building, Terminal Dispatch Building, Boiler House Building, Fare Box Building and a Trailer, Guard House Building, Small Brick Building, and Tower Control Building. There is also a tunnel that connects the Bus Garage Building to the Boiler House Building and a tunnel that connects the Bus Garage Building to the Terminal Building. The building locations are depicted on **Figure 1, Appendix A**.

2.0 ASBESTOS SURVEY

2.1 Purpose

These structures are subject to the facility requirements of the Federal National Emission Standard for Hazardous Air Pollutants (NESHAP) asbestos regulations contained in the Code of Federal Regulations, Title 40, Part 61, Subpart M, (40 CFR 61, Subpart M). The NESHAP regulations require an accredited asbestos inspector to thoroughly inspect the affected facility or the part of the facility where renovation and/or demolition will occur for the presence of asbestos. This includes Category I non-friable and Category II non-friable asbestos containing materials. All regulated asbestos containing materials (RACM) are required to be removed prior to any demolition and/or renovation operations that may result in the disturbance of these materials. The purpose of this Report of Asbestos Inspection is to document the location, quantity and condition of all asbestos containing materials (ACM) that were identified during the asbestos inspection so these materials can be properly handled prior to and during the demolition or renovation.

2.2 Methodology

DLZ conducted the asbestos survey from September 5, 2019 through September 20, 2019 using a State of Michigan Accredited Asbestos Building Inspector. DLZ's inspector, Mr. Dirk Anderson, has a State of Michigan Accreditation Number A11605, expiring Nov 18, 2019.

DLZ's asbestos survey methodology included the following:

- A. Inspection of each structure for potentially friable and non-friable ACM, delineation of the homogeneous areas (materials that are uniform in color and texture), and the procurement of bulk samples from suspect materials.
- B. Sample procurement was performed according to the standards of Federal NESHAP asbestos regulations.

- C. Documentation of the inspection process using the Asbestos field notes that indicate the sample identification number, the sample location, the sample description and other comments regarding the suspect ACM bulk sample. Photographs of the suspect asbestos containing materials are contained in the Photo Log enclosed in **Appendix 3**.
- D. Completion of a chain-of-custody form documenting the sample transport process, and the submittal of the samples to Environmental Testing Laboratories, Inc. in Romulus, Michigan for asbestos analysis.
- E. Analysis of potential ACM containing bulk samples was performed by Environmental Testing Laboratories, Inc. a National Voluntary Laboratory Accreditation Program (NVLAP) approved laboratory with NVLAP Accreditation number 201028-0. Bulk sample analysis was conducted by the Polarized Light Microscopy (PLM) methodology in accordance with the U.S. EPA Method 600/R-93/116. If a positive sample was identified, no additional samples from that homogenous area were analyzed.
- F. Bulk sample results are compared to the NESHAP criteria as defined in 40 CFR 61, Subpart M. NESHAP defines an asbestos containing material as any material that contains greater than 1% asbestos.
- G. A summary of the limitations of the Asbestos Inspection Report are contained in **Appendix 2**.

2.3 PLM Bulk Sample Results

Bus Garage Building and Site

DLZ performed an asbestos survey of the Bus Garage Building and exterior areas of site. Forty-two (42) suspect asbestos containing homogeneous areas were identified. A total of eighty-nine (89) bulk samples were collected and seventy-seven (77) of the bulk samples were analyzed. The sample locations are depicted on **Figures 2-1 to 2-5, Appendix A**. Descriptions of the suspect homogeneous areas and the bulk sample analytical results are summarized in **Table 1, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 5**.

Based on the laboratory results, ten (10) of the homogeneous areas were identified as asbestos containing materials. In addition, five (5) of the suspect homogenous areas were assumed to be asbestos containing materials and were not sampled. A summary of the asbestos containing materials is listed below:

- HA -7 - Sample 07a Paper in electric box
- HA-10 – Sample 10a Mud joints on piping
- HA-11 - Sample 11a Thermal system insulation (TSI), mag-block, on piping
- HA-15 – Sample 15a TSI (mag block) on piping
- HA-18 – Sample 18a Paneling mastic
- HA-20 – Sample 20a Window glazing

- HA-21 – Sample 21a Paper in electric box
- HA-27 – Sample 27a Sealant on conduit
- HA-30 – Sample 30a Window caulk
- HA-34 – Sample 38a Window glazing
- HA-44 (Assumed Positive) TSI (air-cell)
- HA-45 (Assumed Positive) TSI (air cell)
- HA-46 (Assumed Positive) TSI (air cell)
- HA-47 (Assumed Positive) Cloth insulation
- HA-48 (Assumed Positive) Transite roofing/siding material

Terminal Building

DLZ performed an asbestos survey of the Terminal Building. Thirty (30) suspect asbestos containing homogeneous areas were identified. A total of fifty-eight (58) bulk samples were collected and fifty-two (52) of the bulk samples were analyzed. The sample locations are depicted on **Figures 3-1 and 3-2 Appendix A**. Descriptions of the suspect homogeneous areas and the bulk sample analytical results are summarized in **Table 2, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 6**.

Based on the laboratory results, eight (8) of the homogeneous areas were identified as asbestos containing materials. In addition, three (3) of the suspect homogenous areas were assumed to be asbestos containing materials and were not sampled. A summary of the asbestos containing materials is listed below:

- HA-1 – Sample 01a Door and window caulk
- HA-2 – Sample 02a White caulk
- HA-3 – Sample 03a White window glazing
- HA-4 – Sample 04a Gray window glazing
- HA-5 – Sample 05a Red caulk
- HA-6 – Sample 06a Painted caulk
- HA-9 – Sample 09a 9" x 9" floor tile
- HA-23 – Sample 23a 9" x 9" floor tile
- HA-28 (Assumed Positive) TSI (air-cell)
- HA-29 (Assumed Positive) TSI (air cell)
- HA-30 (Assumed Positive) Paper insulation in electrical box

Terminal Dispatch Building

DLZ performed an asbestos survey of the Terminal Dispatch Building. Five (5) suspect asbestos containing homogeneous areas were identified. A total of ten (10) bulk samples were collected and analyzed. The sample locations are depicted on **Figure 5, Appendix A**. Descriptions of the suspect homogeneous areas and the bulk sample analytical results are summarized in **Table 3, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 7**.

Based on the laboratory results, none of the homogeneous areas were identified as asbestos containing materials.

Boiler House Building

DLZ performed an asbestos survey of the Boiler House Building. Seven (7) suspect asbestos containing homogeneous areas were identified. A total of twelve (12) bulk sample were collected and ten (10) of the bulk samples were analyzed. The sample locations are depicted on **Figure 4, Appendix A**. A description of the suspect homogeneous area and the bulk sample analytical result is summarized in **Table 4, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 8**.

Based on the laboratory results, two of the homogeneous areas were identified as asbestos containing materials. In addition, one of the suspect homogenous areas was assumed to be an asbestos containing material and was not sampled. A summary of the asbestos containing materials is listed below:

- HA-2 – Sample 02a White window glazing
- HA 3 – Sample 03a Window glazing
- HA-7 (Assumed Positive) Transite panels

Fare Box Building and Trailer

DLZ was unable to access the interior of the Fare Box Building due to the exterior doors being welded shut. DLZ did perform an asbestos survey of the exterior of the Fare Box Building and the adjacent trailer, which resulted in the identification of three (3) suspect asbestos containing homogeneous areas. The sample locations are depicted on **Figure 5, Appendix A**. A total of six (6) bulk samples were collected and five (5) of the bulk samples were analyzed. A description of the suspect homogeneous area and the bulk sample analytical result is summarized in **Table 5, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 5**

Based on the laboratory results, one homogeneous area was identified as an asbestos containing material and is listed below:

- HA-40 – Sample 40a Window glazing

Guard House Building

DLZ performed an asbestos survey of the Guard House Building. Five (5) suspect asbestos containing homogeneous areas were identified. A total of eleven (11) bulk samples were collected and ten (10) of the bulk samples were analyzed. The sample locations are depicted on **Figure 5, Appendix A**. Descriptions of the suspect homogeneous areas and the bulk sample analytical results are summarized in **Table 6, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 9**.

Based on the laboratory results, one homogenous area was identified as an asbestos containing material and is listed below.

- HA-4 – Sample 04a Exterior caulk

Small Brick Building

DLZ performed an asbestos Survey of the Small Brick Building. Two (2) suspect asbestos containing homogeneous areas were identified. A total of four (4) bulk samples were collected and three (3) of the bulk samples were analyzed. The sample locations are depicted on **Figure 5, Appendix A**. Descriptions of the suspect homogeneous areas and the bulk sample analytical results are summarized in **Table 7, Appendix 4**. A copy of the laboratory analytical results is enclosed in **Appendix 5**.

Based on the laboratory results, one homogeneous area was identified as an asbestos containing material and is listed below.

- HA-39 – Sample 38a Window glazing

Tower Control Building

DLZ performed an asbestos survey of the Tower Control Building. No suspect asbestos containing homogeneous areas were identified.

Tunnels

DLZ performed an asbestos survey of the tunnel connecting the Bus Garage Building to the Terminal Building, which resulted in the identification of one suspect homogenous area. The suspect homogenous area was assumed to be an asbestos containing material and was not sampled. The Tunnel locations are depicted on **Figure 5, Appendix A**.

The tunnel from the Bus Garage Building leading to the Boiler House Building was completely submerged and not accessible for inspection. DLZ did note asbestos containing TSI on the piping in the Bus Garage Building that lead into the tunnel. Based on this observation, DLZ assumes that the piping in the tunnel contains asbestos containing TSI.

Descriptions of the suspect homogeneous areas are summarized in **Table 8, Appendix 5** The asbestos containing material is listed as follows:

- HA-1 (Assumed Positive) TSI (air cell)
- HA -2 (Assumed Positive) TSI (air cell)

3.0 UNIVERSAL WASTE SURVEY

DLZ staff performed a visual inspection of the Subject Facility Buildings, as part of the asbestos survey, to identify readily observable materials that may be classified as a Universal Waste, per R 299.9228 of Part 111 Hazardous Waste Administrative Rules of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (ACT 451) and to identify other potential environmentally sensitive materials that may require special handling and disposal. As part of this visual inspection, DLZ did not collect or analyze any

waste characterization samples from the Universal Waste materials or other potential environmentally sensitive materials. A summary, per building, of the materials identified that may be classified as a Universal Waste and/or be considered potentially environmentally sensitive is enclosed in **Appendix 10** and photographs are contained in the Photo Log enclosed in **Appendix 3**. This summary does not include liquids, chemicals, gases or other products that may be located within the process piping inside and outside of the building.

As part of this survey, a lead -based paint inspection was not performed. However, based on the age of the buildings, it will be assumed that any paint on the buildings should contain lead.

5.0 CONCLUSIONS AND RECOMMENDATIONS

DLZ performed an asbestos and universal waste survey of the DDOT Coolidge Bus Terminal facility. This survey resulted in the identification of thirty (34) asbestos containing homogenous areas and numerous materials that could be classified as a Universal Waste and/or be considered a potentially environmentally sensitive material that could require special handling and disposal. Based on the findings of this survey, DLZ recommends the following:

- Prior to any renovation and/or demolition activities occurring at the Far Box Building, an asbestos inspection of the interior of the building is required to be performed by a State of Michigan Accredited Asbestos Inspector.
- Prior to any renovation and/or demolition activities occurring in the tunnel connecting the Bus Garage Building to the Boiler House Building, the tunnel shall be dewatered to allow for access. Based on the potential for asbestos to be present in the tunnel on the piping, the water in the tunnel shall be considered an asbestos containing waste and shall be properly handled and disposed of in accordance with federal, state, and local regulations. Upon completion of the dewatering of the tunnel, an asbestos inspection of the tunnel shall be performed by a State of Michigan Accredited Asbestos Inspector.
- All asbestos containing material that were identified will require abatement prior to the start of any renovation and/or demolition activities that may have the potential to disturb these materials. The abatement shall be performed by a Michigan Accredited Asbestos Abatement Contractor using Michigan Accredited Asbestos Abatement Workers. The removal and disposal of the regulated asbestos containing materials shall be performed in accordance with all federal, state, and local requirements.
- Prior to any renovation and/or demolition activities occurring at the Subject Facility building, the materials classified as Universal Waste are required to be removed and properly packaged and disposed of in accordance with the requirements set forth in R 299.9228 of Part 111 Hazardous Waste Administrative Rules of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (ACT 451)

- Prior to any renovation and/or demolition activities occurring at the Subject Facility buildings, the materials identified as potentially environmentally sensitive shall be properly characterized and then handled and disposed of in accordance with all federal, state, and local regulations.
