CITY OF DETROIT BOARD OF POLICE COMMISSIONERS

RE: Special Meeting

Page 1 - 100

Proceedings held in the above-entitled matter Taken at 1776 w. Warren Ave.
Detroit, Michigan,
Commencing at 6:30 p.m.,
Thursday, September 8, 2016,
Before Melinda R. Womack, CSR3611.

APPEARANCES:

WILLIE E. BELL - Chairperson LISA CARTER - District 6 REGINALD CRAWFORD - District 3 RICHARD SHELBY - District 1 WILLIE E. BURTON District 5 RICARDO R. MOORE - District 7 DERRICK SANDERS - Appointed EVA GARZA DEWAELSCHE - Appointed ELIZABETH BROOKS - Appointed CONRAD MALLETT - Appointed

ALSO PRESENT:

Mr. Gregory Hicks - Secretary to the Board Ms. Pamela Davis-Drake - Chief Investigator Chief James White - Assistant Chief Mr. Robert Brown - Administrative Assistant Sergeant Alan Quinn - Recorder

PANELISTS: LESS THAN LETHAL WEAPONS

Mark Fancer - Staff Attorney for the Racial Justice Project, ACLU of Michigan
Mark Young- President Detroit Police Lieutenants and Sergeants Association
Christopher White, Coalition Against Police
Brutality
Isaiah McKinnon - Former Detroit Police Chief and Former Deputy Mayor
Robert Dunne, M.D. - Vice Chief of Emergency
Medicine at St. Johns Hospital and DMC

Page 2

- 1 Detroit, Michigan
- 2 Thursday, September 8, 2016
- 3 About 6:30 p.m.
- 4 CHAIRMAN BELL: Good afternoon. We should
- 5 say good evening. I always make sure you're with us
- this evening. Thank you for your attendance. I'm
- 7 going to call the meeting to order. I am Chair Willie
- 8 Bell from District 4. At this time I'm going to ask if
- 9 Bishop Cheryl Myhand would come forward to opening
- 10 prayer. That's you, young lady. Yes, ma'am. The
- 11 podium, please, if you would be so kind.
- 12 (Invocation given).
- 13 CHAIRMAN BELL: Thank you. Bishop on the
- 14 Chief Craig's advisory team. We just met so I thought
- 15 it would be appropriate since Bishop Vann is not here
- 16 this evening, but we're going to start with the
- introduction of the board to my left.
- 18 COMMISSIONER SHELBY: Commissioner Richard
- 19 Shelby, District 1.
- 20 COMMISSIONER CRAWFORD: Commissioner Reggie
- 21 Crawford, District 3.
- 22 COMMISSIONER BURTON: Police Commissioner
- Willie Burton, District 5.
- 24 COMMISSIONER MOORE: Good Evening. Police
- 25 Commissioner Ricard Moore, District 7 and also the Vice

	Page 3
1	Chairman of the Board of Police Commissioners. Thank
2	you for coming out this evening.
3	COMMISSIONER CARTER: Good evening. Lisa
4	Carter, District 6.
5	COMMISSIONER BROOKS: Good evening.
6	Elizabeth Brooks, Appointed.
7	COMMISSIONER MALLETT: Conrad Mallet.
8	COMMISSIONER SANDERS: Good evening. Derrick
9	Sanders, Appointed.
10	COMMISSIONER DEWAELSCHE: Eva Garza
11	Dewaelsche, Appointed.
12	CHAIRMAN BELL: Thank you. And at this time,
13	I'd like to introduce Assistant Chief James White to my
14	far left.
15	A.C. WHITE: Good evening everyone, and I'm
16	glad you were all able to come out and make it tonight.
17	CHAIRMAN BELL: Thank you. And I'm going to
18	ask the Board Secretary to introduce the staff of the
19	Board of Police Commission.
20	SECRETARY HICKS: Thank you, Mr. Chair. I
21	just want to introduce, first of all, Chief
22	Investigator Pam Drake. Pam is in front us and she
23	will introduce her staff. In addition to that, Robert
24	Brown is here. He's down over in this area here and
25	Sergeant Quinn, Media Services both of them are

	Page 4
1	assisting us this evening. And Mindy Womack is also
2	our court reporter for this evening. And just for the
3	record, Mr. Chair, you do have a quorum.
4	CHAIRMAN BELL: Thank you. At this time I'd
5	like to introduce
6	SECRETARY HICKS: Pam.
7	CHAIRMAN BELL: Yes, ma'am. Go ahead.
8	C.I. DAVIS-DRAKE: Good evening, everyone.
9	Chief Investigator Pamela Davis-Drake. With me today
10	is Senior Investigator Melanie White. If you would
11	just raise your hand so everyone in the knows who you
12	are. Also Supervisor Investigator Abdullah Nelson,
13	Senior Investigator Rosia Madrigal and Investigator
14	Rosalind Banks.
15	CHAIRMAN BELL: Okay. Thank you. I'd like
16	to introduce Commissioner, Jewel Ware of Wayne County
17	Commissioner. Thank you for your attendance. Any
18	other elected officials in the house? Anyone
19	representing elected officials? If not, thank all of
20	you for your attendance.
21	And at this time, I'd like to make a
22	statement. Tonight we have reduced our agenda to give
23	the greatest amount of time for a special discussion
24	about the use of force when in our community.

Specifically, we would like to learn about the use of a

25

class of weapons used by law enforcement that some say reduces the fatal contact of law enforcement and others

Page 5

3 say responsible for more or as many fatal encounters

4 with law enforcement.

2.2

Tonight we have assembled a special panel of experts and observers to help shed some light on an important exchange within the community. On the generalization weapons category of less-than-lethal weapons we have a wide variety of weapons including beanbag propelled rifles, blunt and pack projectiles, pepper grenades, rubber bullets, heat rays and one would often find police — used mostly by police detainees. And that's something that I was not totally familiar with all the weaponry that we have utilized versus nonlethal weapons.

Tonight we're interested in exploring this topic from several vantage points. As a Civilian Oversight Board, we are concerned about the people when in our city and, therefore, interested in hearing from the community representatives. We are concerned that black and brown communities suffer from elevated level of blood pressure and hypertension as well as other medical issues and, therefore, evaluated medical effects from the use of weapons like tasers. We are concerned about the potential violation of civil

liberties and human rights.

2.2

Finally, we are concerned for the men and women who work on the streets having contact with our citizens who are, in turn, exposed to life-threatening combative situations every day. To address these issues, we have invited tonight five outstanding individuals from a cross section of our community to give their perspectives on less than lethal weapons.

Our special panel discussion will be followed by questions from the commissioners and concluded with questions from the general audience. Each panelist will have about ten minutes to make a presentation to us. After the panel's presentation, we would take a short ten-minute break and return for questions. We ask you to hold your questions until we have heard from the entire panel. So, on the back table, we have several blank cards that you can use for notes or questions. Again, please hold your questions till we have heard from the entire panel.

Tonight, I'm going to introduce the panel.

They need no introduction. Former Deputy Mayor, Former Chief, and my boss at one time, Isaiah McKinnon, Chief Ike. And Robert Dunne from the medical profession Vice Chief of Emergency Medicine at St. Johns and DMC. And Mark Fancer, Staff Attorney for the Racial Justice

Page 7

1	Project, ACLU of Michigan. And Christopher White,
2	Coalition Against Police Brutality in Detroit. And
3	Mark Young, President, Detroit police Lieutenants &
4	Sergeants Association.

23

24

25

As you see, we have an outstanding panel. We're going to move forward and make an adjustment and seat the panel now, and we can get rolling. I will serve as your moderator this evening, and it should be interesting and very informative to have this type of panel and have this type of dialog. And I'm glad to see this attendance this evening because I think it's very meaningful if we move forward. As the Board of Police of Commission we have some meaningful subject and meaningful dialog and have input from the community. Thank you. If we can make that adjustment now. Mr. Brown, you're going to help us keep time, that will be very helpful as we try to stay on schedule make sure we move to especially the community aspect part of the program. And we're going to kick it off with Mark Fancer, staff attorney from ACLU Racial Justice. That's to my left.

MR. FANCER: Thank you very much. It's a great honor and privilege to be able to discuss this topic because it is of such vital importance. The ACLU of Michigan has had a longstanding concern about the

2.2

use of tasers for a number of reasons arising largely
from a study that we did a few years ago where we
solicited through the Freedom on Information Act police
reports from a number of different police departments
across the state regarding their use of tasers. The
incident reports that we reviewed showed a number of
things. They showed, first of all, that with respect
to where on the use of force continuum, different
departments placed the use of tasers. It's all over
the lot.

Page 8

We found that there were policies in place in some police departments where it was clear from the reports that we saw that police officers did not have a clue as to the existence of these policies because their actions were completely in contradiction with what the policies required. We found that some policies were inconsistent with governing law.

And in addition to that, and it's an overriding concern that we have, is that the taser manufacturer itself has come forward with warnings about the use of these devices, which should give pause to any police department that's even thinking about adopting these as part of their arsenal. Just to give you some examples. These are warnings that are produced in and published by the manufacturer itself.

It says quote, cardiac capture may be more likely in
children and thin adults pause the heart is usually
closer the CEW, that's the taser, delivered discharge
the dart-to-heart distance. Serious complications
could also arise in those with impaired heart function
or in those with an implanted cardiac pacemaker or
defibrillator.

It also says CEW use on a pregnant, infirm, elderly, or low body mass index person or on a small child could increase the risk of death or serious injury. As with any force option, CEW use has not been scientifically tested on these populations.

Now, we're concerned about this because very often we find that with respect to practices that are permitted and not permitted that very often law enforcement administrators will hope that if they put into place policies that restrict or limit the use of particular weapons that the problem is solved. But what we saw in the reports that we found were incidents where police officers use tasers on children.

And so the fact that the warnings are there, the fact that the policies are in place do not take into account the police officer who, for whatever reason, is ignorant of those warnings or those policies or who consciously chooses to disregard them and the

risk is far too great. When the manufacturer itself
tells you that it's dangerous to use these things on
certain populations and you present the risk of use on
children, of elderly people, of pregnant people, then
you have a problem that is worth considering and
addressing.

In addition, this is also from what the manufacturer says. Is says CEWs are not precision aimed weapons. Probe discharge -- before I go on, for those who don't know how a taser works, what it is is a pistol-like device that fires probes or darts into the flesh or the clothing of the person who's targeted.

Attached to the darts are the probes. It's a wire. And through that wire runs an electric current, all right?

And so when it references probes, it's talking about those darts that are fired into the target. CEW's are not precision aimed weapons.

Probe discharge flight trajectory impact location can be affected by numerous factors, including cartridge or probe accuracy, failure of cartridge to properly deploy, strong air movements, user and subject movements or probe striking subject, clothing or object with insufficient force or trajectory to penetrate or adhere to the sub. Now that's significant. What they're admitting is that you can't aim that thing and

guarantee	precision.

Now, it also has the following warning. It	-
says when practicable, avoid intentionally targeting	
the CEW on sensitive areas of the body such as the	
face, eyes, head, throat, chest area. The area of th	ıe
heart, breast, groin, genitals are known preexisting	
injury areas. But it's basically saying it says the	
only place that you can really safely, reasonably	
safely target these devices is on the limbs and the	
preferred targets are the back or the stomach area	
heneath the chest	

Now, this puts all of the officers using this the burden of trying to use and aim a device which by the manufacturer's own admission is one that you can't really aim with accuracy. And what happens, if one of these things happens and the factors that they listed which can cause inaccurate aim results in the probe, even though you're aiming for the stomach, it ends up landing in the heart area? What happens if it ends up landing in the groin area? What happens if it ends of landing in the eyes? Are you going to say oops? I mean it's too big a risk to take.

Beyond all of this, and assuming for whatever reason lunacy takes hold and a decision is made to actually bring these things into the arsenal of police,

2

13

14

15

16

17

18

19

20

21

2.2

23

24

25

then what you also have is an ignorance in many
quarters of exactly what the law allows with respect to
use of these devices.

I've had any number of police officers say with conviction that the taser is something that can be used for purposes of compliance. In other words, when you have an uncooperative suspect, someone who's not following orders, that the taser can be used to force compliance. We have reports that we have, incident reports where, to give you one example, a person is intoxicated, the person is halfway inside of police cruiser, the legs are hanging outside of the vehicle, the torso is on the inside of the vehicle, and notwithstanding repeated orders to get inside of the cruiser, the suspect refuses to get in. And what happened in that incident and actually others like it is that the darts are removed from the taser device and it can be used in what's called a dry stun. And so what you do is you place the device directly on the person and administer the shock in that way. What they did is they dry stunned the person to force the person to get inside of the vehicle. That is inconsistent with governing law in this jurisdiction.

There's a case that was decided by the 6th Circuit Court of Appeals called Austin versus Redford

Page 13

Township Police and what it says in no uncertain terms
is that the only occasions where it's reasonable to use
a taser is on two in two instances. One, when
there's the potential escape of a dangerous criminal or
there's a threat of immediate harm and they explicitly
say that it cannot be used for purposes of compliance.
So as long as there's this myth that's circulating in
many circles that it can be used for purposes of
compliance. There is the risk that there will be
overuse of these devices creating dangerous situations
for people.

Now beyond all of that, we've talked a lot about tasers, but one final thing that I do want to encourage, if we're talking about less than lethal force, you know the Chairman listed a number of different options that are available without using tasers. Batons, pepper spray, beanbag, all kinds of things are available without using tasers, right? And it really, it raises questions, at least in the minds of a civilian about a police officer who's armed with all those things is still not able to gain control of two middle school children who are fighting and he wants to use a taser on them, or someone who's highly intoxicated, knocked down drunk and they can't get control of them. Somehow, somehow, you would think

1

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

25

that a police officer or combination of police officers
would somehow manage to be able to control situations
like that without using an electrical device.

Page 14

But if you want to really get to the root of the problems that plague many of our communities, particularly that plague communities of black youth, then it's not a question of just treating symptoms and trying to control the situation and contain it. got a real crisis on our hands. And very often when we talk in the national discussion that's going on now about police shootings, people quickly pivot and say well what about all the black on black crime? Well, one of the responses that must come immediately to mind is the fact that yes, black youth kill each other, but they kill each other because they hate themselves. They know nothing about themselves. Everything in this society tells you if you're a black male youth that you are worthless. That you will never amount to anything. That you're taking up space. That you're a drain on society. And so if people want to do some good, including police officers, one of the things that will help is to affirm the wroth of these young people because not only do they feel that they're worthless, they feel anybody like them is worthless and they have no objections, no reluctance to take their lives.

Page 15

1	So if police are unable because of time or
2	budget to spend time affirming the worth of youth, I
3	would go so far as to say then reduce the number of
4	police officers, put people on the force and pay them
5	with municipal dollars to go into these communities to
6	work with black youth and affirm their value. Tell
7	them their history. Tell them their culture. Help
8	them to understand that they have potential; that they
9	have options and once they begin to love themselves,
10	they'll love others like them and they will not engage
11	in the violence that we've seen occur in such high
12	levels and cities throughout the country. Thank you.
13	CHAIRMAN BELL: Next speaker I want to ask
14	Chief Ike McKinnon to respond.
15	CHIEF McKINNON: I'm not responding in terms
16	of
17	CHAIRMAN BELL: I'm sorry. You've got ten
18	minutes.
19	CHIEF McKINNON: And so and the person's
20	who's been through this, number one, is the law
21	enforcement officer. Number two is the person who's
22	lived in Detroit for most of his life. Number three,
23	who as a Police Chief lost four officers, and number
24	four is the person who as I came up to the Detroit
25	Police Department lost a witnessed a number of

Page 16

1	officers losing their lives. And so I think I can
2	agree with Mark on this that this is a public health
3	concern. It's not just something that is specific to
4	Detroit, it's something across the country. I was in
5	Washington D.C. last year invited by the Justice
6	Department at a forum similar to this in which they
7	asked what can they do about the number of the
8	amount of violence, the number of shootings that goes
9	on. And I asked this question. We had a number of
10	police chiefs. We had deputy mayors. We had mayors
11	there, and we probably had about 250 there. I asked
12	this question. I said as a young boy growing up in
13	Detroit, this is what I saw, to belabor a long point, I
14	was a victim of police brutality. And I think all I
15	saw at that time were people who didn't look like me.
16	I said in 1967 I was shot at by fellow officers. And I
17	said now, I'm saying this to you because throughout
18	my tenure as a police officer I was shot at eight
19	times, and thank God they missed me. But I said this,
20	I said this is important for us to understand that
21	there are a great number of people who are being shot
22	at are being shot, and we as polices officers have to
23	understand it's not an us versus them mentality.

Certainly as a person that's been around here forever, what do we do? We can't take the position of

24

25

1	well, you know, it's those damn people that's
2	committing those acts and we have to go out and do
3	this. No. We have to look, as Mark said, we have to
4	look at ways that we can hopefully alleviate some of
5	those problems because if not, officers will lose their
6	lives, people will get shot at, as I did, and we'll
7	continue to have problems that we've had throughout the
8	years here and around the country. We've been
9	fortunate here. I mean I went through 1967 and almost
10	lost my life a few times and know people who did.

But listen, we ask ourselves, what is reasonable force, and those of us in law enforcement well, if somebody threatens your life, you have to use whatever is there to take them out. Well, think about this in terms of a person who's on the street who hasn't seen that. I was talking to some people last week about some of the things that we've seen on TV in terms of officers and what they use. Please understand this, as officers, there's a certain thing that we do, but people in the street certainly who grew up as I did, they said man, you know, the cops are out to get me. If they're out to get me, when they stop me, they're going to beat me up or they're going to shoot me. You have to understand that. That's a mentality where young people, whether they're black or brown or

2

3

16

17

18

19

20

21

22

23

24

25

Page 18

whatever it might be, they say the police officer is
out to get me. So we as officers have to understand,
we can't change all of society. We have to do whatever
we can to take it, make an effort to say we're going to
train and retrain

Now, I was -- they used gas on me to let me see what it was like. It was hell. They used a beanbag on me to see what it was like. It was hell. But there's things that we in law enforcement must do to let the people know in the community that we are out to help you as much as possible. We can't say well, it's their fault, it's their fault. It's important to us as law enforcement officers to say look, here's what we can do to not only meet with you to talk with you, we're going to try to eliminate those problems. But as a person who's been around forever, and certainly in the capacities I've been in, we have to do as much as we can to train and retrain and educate. If we don't do that, these things continue because young people, I have two sons and one's 38 and the other is 32. But we talk about this conversation we've had with you people, particularly young black men, what do you do, how do you do, how do you respond if you're stopped by the police? Well, you know, that's a reality. And I said this to this group down in Washington D.C., and nobody

2.2

Page 19

could answer that. How do you answer that? Young
people are afraid and so they make a firm gesture
toward the police and the police are afraid too. And
then someone might lose his or her life so there's an
understanding here.

And so what you said, Mark, in terms of officers learning how people respond, how they act, what you should do and make certain that everybody learns from this. This is a major, major problem and concern for every community in this country and we as loss enforcement have to understand that there are things that we have to do. We have to make that first move. There's 300, what 30,000,000 people in this country, there's 700,000 law enforcement officers, there's 700,000. So who's going to make that change. And we can't continue to let all police departments with individuals who might have a propensity for acting out and using deadly force. This is important.

Look at the officers back here. They've all gone through major major evaluations, they've been around for a long time. If we look at their backgrounds, and some of the backgrounds that we see of officers whether they're trained, they're educated, it's important. If we can understand the importance of education and training and understanding communities

2.2

Page 20

and going out and talking to people, we got to get away
from, I keep saying this to you, it's not an us versus
them. If we can get away from that as those of us in
law enforcement and say I'm going to do everything that
I can, everything that I can, not only to educate
myself, but to educate my fellow officers.

You know, this will be a first start whether you're using a taser or whatever it might be, a beanbag, but deadly force is the ultimate. And think about it. Once you do that, your life has changed forever, certainly that person who has lost his or her life, their life has changed forever, but your family and his or her family is changed forever.

So sometimes, as I used to say to the officers who worked for me, sometimes you might have to take a step back. We know that we're afraid, we know we have to take precautions. I have a chief who said everybody's going to wear a bulletproof vest. I remember back to those times, Mark, that not you, but others before you, said we don't want to wear a bulletproof vest, and an officer was shot in the chest, and thank God the bullet hit and went along the vest and came out his arm. And so now, that was an education, but it's also an education for everybody. This is a crisis for all of us, it's not just for the

	Page 21
1	community, for the police, we have to take a stand also
2	and say look, here's what we're going to do, educate
3	ourselves and stand by our community and make this
4	tremendous change that has to be made for our city.
5	The last thing. What alternatives do we
6	have, those in law enforcement? What alternatives do
7	we have. We have to look at that. What alternatives
8	do we have. Is that the last resort? Because once you
9	pull that trigger, there's no pulling it back, there's
10	no pulling it back. I mean that's such a frightening
11	thing.
12	An officer who leaves home in the morning or
13	evening or at night and who goes to work, he or she
14	wants to go back home the same way they came. As I
15	told you, I think between 1965 and when I retired the
16	first time in 1998, there's probably up 40 officers who
17	lost their lives. As I said before, during my tenure
18	as Chief there was four. Everybody wants to be safe
19	and we have to figure the best ways to make all of us
20	safe. We have to look at this entirety of community.
21	And that's it for my roll. Any questions?
22	CHAIRMAN BELL: Thank you, Chief. Next
23	speaker will be Christopher White from Coalition
24	Against Police Brutality.

MR. WHITE: Good evening everyone.

25

1	you, Chairman and the Board of Commissioners,	
2	administrators in charge of the Detroit Police	
3	Department for allowing us to present and state our	
4	position on the issue of tasers. To get straight to	
5	the point, our position is we're opposed to the use of	
6	tasers. That's been the position of the Coalition	
7	since the late Father Ron Scott and that's the position	
8	of the Coalition under the current President, Sandra	
9	Hines.	

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

25

And the Chairman opened up, eloquently stated several different tactics that can be used to deescalate a situation. The Coalition supports deescalation. We're not anti police, we're anti police brutality. We support use of body cams. But one of our concerns is if you take a look at the Baltimore 7, one of the first things that's listed in the newspaper is that the Baltimore Police Department abused the policy and didn't follow federal guidelines when using tasers and that's when you peel back the onion after the shooting that took place and the problems that they have in Baltimore. Miami has the same challenges with the use of tasers. Also in the City of Warren they began the process of using tasers, but their chief and mayor concluded that it was not an effective use for a tool to use for deescalation. So these are just a few

2.2

examples of departments with bad training, this is what happens with tasers.

Second, we take a look at the health of an individual who's, I myself, like probably most of the people in this room, even some of you officers when you see your paycheck you probably take your Norvasc and your hypertension medicine as well. The point is that we are in stress. I have hypertension and I know right now if you all shot a taser and missed me, I might even pass out. So the bottom line is we have to be ever concerned about the condition, as you opened up, from hypertension, diabetes, mental challenges that individuals face, and that has to all be taken into account when we're talking about tasers, which most people in the streets will view as another form of a weapon.

Finally, when we're talking about community policing, if you take a look at Chicago, Baltimore, Milwaukee, these incidents that have taken place in these cities have all stemmed from a lack of community and police relations. Here in Detroit we do have a commission that's bringing forth various experts to even have the discussion, I doubt very seriously if those type of events even took place in those cities, Ferguson, and things of that nature. The point being

that when we're talking about community relations with
police, to discuss this type of weapon moves us away
from the direction that we should be going as far as
how to strengthen the relationship with the community
and the police. We should not be having these types of
discussions if, to this day, we do not, we have not had
the types of incidents in a long time that they've had
in Ferguson, a long time that they've had in Baltimore.
We've done that without the use of tasers so we don't
need to start to going backwards. When you start your
car, you put it in drive, it should go forward. If you
put it in drive and it goes backwards, there's
something wrong with the transmission. The point being
that we are in a different positions. We have an
opportunity to become the gold standard.

Now, there would be some that will say, well you had 32 shootings over Labor Day Weekend. We need to do something about that. Well, those are two separate topics. The 32 shootings are a result of community groups and the community and this investment and things of that nature, we do have to address that. I was in Chicago. I was on the corner of 79th and Halstead and I asked some of the brothers out there, why you all killing each at the rate that you're doing in Chicago, and the first thing they did was they

pointed at the Loop and they said Trump, and this is
before he made a mockery of himself and tried to run
for president, they pointed at the Loop and they said
we cannot see ourselves in those skyscrapers, and that
simply means they can't see themselves as decision
makers. They can't see themselves as stockbrokers.
They can't see themselves as advertising executives.
Now, we have an opportunity here with a lot
less of a population in 2.8 million to use our
department, our community and everything to help
instill hope and our youngsters and our children and
even some of the adults that are going in the wrong
direction. I don't think at a time like this of what's
happening all across this country that we need to be
entertaining this type of discussion. We could look at
some of the other forms that were presented in the
beginning, but our position has been, and always will
be at this time, against the use of tasers. Thank you.
CHAIRMAN BELL: Thank you, Mr. White. Our
next speaker is going to be Robert, Dr. Robert Dunne
from St. John and DMC. He's Vice Chief of Emergency
Medicine and he is our next speaker at this time.
DR. DUNNE: Thank you. I've been an

Certainly we've seen a lot of injured patients in the

25

	Page 26	
1	emergency departments, as everyone's aware. This topic	
2	came up as many of the other speakers talked about	
3	because of various different things that are out there.	
4	There is a fair amount of medical literature looking at	
5	different types of wounds and wounding patterns. In	
6	medicine we refer to these weapons as less lethal, not	
7	less than lethal, because what we know is that	
8	literally any type of weapon could kill somebody, and	
9	certainly people have been killed with open hand,	
10	closed hand techniques, batons and many other things as	
11	well as projectile weapons like the rubber bullets and	
12	beanbag buttons that were mentioned earlier. One thing	
13	that's true for every one of these weapons and devices,	
14	including the taser, which has been dominating the	
15	discussion, is that things that are designed as weapons	
16	aren't tested clinically like the way a new medical	
17	device may be or a new medication. So the reason we	
18	have information about them and their effects is from	
19	the observations we have gathered from taking care of	
20	patients, and people write this up, people do research	
21	on it, and Mark mentioned some of the research that's	
22	out there.	
23	So when we look at the various weapons,	
24	they've all been implicated in deaths. People have	
25	tried to determine what the potential for causing a	

Page	2	7
------	---	---

lethal injury is in each of these types of weapons, and
it's difficult to do because we don't have necessarily
good empiric data, but we can talk about a few of the
things. We certainly know that bare hands, opened and
closed hands certainly account for a number of deaths
both at the hands of individual perpetrators and at the
hands of law enforcement. We know that batons can be
potentially dangerous. Any one of these things can be
dangerous. The reason we call them less than lethal
weapons is because they were designed to be not a
definitely lethal option as opposed to the design of
the firearm, which has very different wounding pattern
when we look at wounds from firearms, which are also
very well studied both in the civilian and military
population. Clearly that's a weapon that's designed to
be lethal in its design.

So when we talk about this in the medical literature when people are quoting on medical literature, there's different types of discussion about different types of weapons. They mention the term CEW. That term is used that's conducted energy weapon. That's what a taser is. The taser is not the only kind of weapon like that. People have seen or heard of other types of stunning weapons. It's just that taser's probably the most common one that's deployed,

not just in the United States, but in other parts of the world.

2.2

weapons. They deliver a fairly high amount of voltage, as he mentioned, as Mark mentioned, he talked a little bit about it, but they're starting out with a fairly high voltage within the weapon itself. That sounds a lot, 50,0900 volts, a lot of voltage at not necessarily a very high current. When we look at what's actually delivered to the tissue, it's about 1,900 volts that's delivered to the tissue in a series of pulses in most of these types of weapons.

think medically? And there are certainly observational studies. People have volunteered to have been tasered. If you've never looked at any of that, it's interesting to look at. There are a number of videos out there of volunteers who were either getting in training or doing this as part of some type of research study, and that voltage actually causes the muscles to contract violently and stimulates the nerves to the point where they're overstimulated and the person loses the ability to control the muscles and nerves, and that's really the idea behind these weapons. And they've actually been around for a long time and they predate the taser.

2.2

Page 29

But before, most of them were contact weapons. They
had to be used directly touching someone's skin, which
meant that they were used in situations where they were
actually close enough to be within arms reach of a
person. The taser was different because it shot out a
barb up to 35 feet with a compressed air charge, so
that kind of change the use and increased the use of
these of these weapons. So when we look at the
literature, we see a lot more literature that's talking
specifically about the taser, in addition to the
manufacturer has sponsored some research on their. But
there's nothing comprehensive.

If we look overall, a good kind of take-home point is estimates from what we know in the medical literature is that the lethality of the taser is probably somewhere between one in 10,000 and one 100,000 uses.

Now what do we know about those deaths? We know something about them. Many of them have been comprehensively studied. There were autopsies on many of these people and there is research that is published case series from these medical examiner studies and from looking at deconstructing the incident itself. So we know that people who are on stimulant drugs, whether they're prescription drugs, whether they're street

2.2

drugs like methamphetamine and cocaine seem to have a
higher risk. People who have some preexisting disease
seem to have a higher risk. There are deaths in people
that had no identifiable prior risk, and again, without
any specific in-depth studies being done, it's hard to
characterize that.

So there's definitely information out there.

And Mark also mentioned the manufacturers warnings. I

was going to talk about that a little bit as well

because that was the manufacturer's response to some of

the published data that was out there about how to use

weapons differently.

These are certainly out in use in various parts of the country and various parts of Michigan. We have actually currently in Michigan a state emergency medical services and EMS protocol in regards to patients who have been tasered, if you will, that addresses taking out the barbs. The barbs are like a fishhook. The actual kind of business end of the taser sticks into the skin and you have to take it out like the way you take out a fishhook. So there are protocols that cover that and there are protocols that cover the evaluation of a person who has been tasered. So specifically, looking for signs of distress.

Checking vital signs. Considering putting the patient

1	on a monitor. In many places routinely recommend tat
2	they will either in the prehospital or bring the
3	patient to the hospital, monitor a patient after they
4	have had an energy weapon used on them. So there are a
5	number of recommendations out there. As I mentioned,
6	our state does have a protocol specifically covering
7	the areas where this is being used.

I think as we go forward tonight answer some questions when we get to the question and answer question, but that just provides a summary of some of what's out there. Thank you.

CHAIRMAN BELL: Thank you, Dr. Dunne.

Last but not least on the panel would be Mark Young, President of the Detroit Lieutenants & Sergeants Association, LSA.

MR. YOUNG: Thank you. First of all, I'm honored to be here. I wrote some notes so please be patient with me. It's been a long day, but it's been an awesome day for the Detroit Law Enforcement community. I'm also the president -- I'm the president of the Detroit Lieutenants & Sergeants Association. I represent the detectives, investigators, sergeants and lieutenants. I'm also in a unique position to be the associate of NAPO, The National Association of Police Organization, the vice president of the associate

2.2

Page 32

membership at large. Normally, I don't talk about that
a whole lot, but the reason why I'm going to talk to
about that today is because I get to see what's
happening around the world, what's around the country,
and it's powerful.

These are difficult and troubling times. If anybody in this room don't believe that, then you are in the wrong place. This is a tough city. This is a very tough city. I have the distinct honor of representing the heroes that respond to your calls when you need them. I'm blessed and I'm proud about that.

My heroes or dependable, not expendable, not at all.

While tasers are not the total solution, they're a good start. You have an obligation to these men and women that go out here every day to serve your community to give them every tool that you possibly can give them and then some. So let's talk for a minute. First, you need funding and support, and you need to support these people that's out here because they're doing a damn good job. It's very few of them and the taser is important for them. Then you need to make sure they get the updated, the latest technology that's going to keep them safe every day, whether it's bulletproof vests or upgraded equipment.

Let's talk about parents. We need to do some

1	parenting because we don't want to have the contact.
2	You grab your own child. Community policing, community
3	policing, we need that too. When Chief Craig, we got
4	that, with the heroes that I represent, I'm very proud
5	of that. And the law enforcement involvement that we
6	have now is pretty good. In fact, we got a field day
7	Saturday, that's awesome, that is very awesome. We
8	need to educate. I know that math, history, algebra
9	and all that stuff is important, but guess what, we
10	need some classes in civility. We need some conflict
11	resolution. We need some conflict management. This is
12	a tough damn city. We need some church involvement. I
13	live in the City of Detroit. I love here, I live here.
14	So guess what, there's a lot of storefront churches,
15	there's a lot of big churches. We need them to step up
16	because we don't want to use tasers, no, no, not at
17	all. So we need some mental health funding. When you
18	closed the mental institutions, guess what you did?
19	You dumped your problems on the people that's
20	responding and those create a greater chance of
21	hostility for the law enforcement officers that I
22	represent.
23	Let's talk about the veteran funding. We
24	need to make sure our veterans are taken care of

because keep this in mind, those are people that need

25

1	help too. And those are some of our most violent
2	encounters. They're suffering. And you know what,
3	they're good people and we encounter some of them too.
4	We got PAL, so we need to use that outreach to touch
5	those 14,000 youth. We also need a justice system that
6	matters and a justice system that's going to hold
7	people accountable. Most of our violent encounters
8	that we encounter that might be tasered or otherwise,
9	they've already been in the system.
10	No, tasers are not the total solution, but

No, tasers are not the total solution, but it's a great start, and you owe these men and women that's out here that.

2.2

First all, the taser on the side, the visual, I hope that the visualness of the taser on my member's thigh is enough to change a violent person's intentions. I can tell you this, the reactionary gap is normally 20 feet. Most law enforcement officers know the intentions of someone once they encounter them. I'm going to tell you something. I know. I've been there. We need to neutralize that threat and we need to neutralize it, and I know there's some fatalities with tasers. I'm not going to sit here and blow smoke up you, but I can tell you this: how many non-fatalities have been because the officer withdrew the taser or because the person saw the taser?

1	There's no perfect thing here. The injuries
2	to officers and the fatalities would be minimized.
3	There will be some liability, of course. If you can
4	tell me something that is not going to be breaking, I'm
5	willing to listen and entertain it.
6	So I'm going to tell you a story. I'm almost
7	through. When I first got I got 29 1/2 years on the
8	Detroit Police Department. When I first got assigned
9	to the 6th precinct, the first person I met was a guy
10	named Andre Barksdale. He said my name is Dre.
11	Welcome. Hey, I was so honored because he was almost
12	the same age as me and he was a young African-American
13	like myself. I was humbled because I met this guy and
14	he opened up to me. Well, on November 3rd, my friend,
15	Andre Barksdale, was killed by an individual named
16	Jessie White who was a black male, 21, in a closed
17	quartered incident while Andre was trying to wrestle a
18	baby from his arms knowing that the baby was already
19	killed. Andre Barksdale while wrestling with this
20	individual, his weapon fell out of his holster. Jessie
21	White grabbed the weapon, shot Andre and shot Sergeant
22	Mitchell. Andre died from his injuries. I never got
23	over that. It was a close quarter incident. If he had
24	had a taser, might have been a different situation.
25	I know of no law enforcement officer that

wants to take another life. In fact, the law
enforcement officers I know do so begrudgingly and they
suffer greatly from posttraumatic stress disorder,
depression, suicide, insomnia, alcoholism and other
vices, including divorce. Yes. So when you see the
news and you think that this law enforcement officer
got his chest stuck out because he had to use fatal
force, he's devastated I know. I've had many of them
cry in my arms, and some of the biggest of guys, and it
blew me away. I know. I've been there myself.

So when you talk about these tasers, I am for them, if you didn't get that message already. You have an obligation to do so. The liability decreases. The sick time of the members, not only the sick time decrease, the injuries, the medical cost to the officers because yes, a lot of these officers that get in these close quarters, they're severely injured. You don't know this, but the injuries carry over into retirement. Let's talk about that. We took away their retirement and health care. Most of the injuries that law enforcement officers suffers, manifests after they retire, the stress, the injuries, the illnesses, the car accidents, the back problems from wearing a weapon, all that stuff manifests afterwards. So now we're not going to give them a weapon that's going to make sure

1	that they get home. I was one of those officers that
2	used to put on his bulletproof vest, wear his uniform
3	to work and flinch, something told me don't go to that.
4	Realizing I didn't make up my bed and wondering if
5	something happened to me and somebody come into my
6	house and see that I was sloppy today. Real talk.
7	Here's what else you should know, and I'm
8	almost done. Law enforcement numbers across this
9	nation are shrinking drastically. The likelihood of
_0	backup is less. That taser is that partner. That's
1	huge. I'm praying that just having a taser on their
_2	waist accomplishes the task without deployment. And
13	let's talk about that. Just the fact that I pull out
_4	that taser, I bet you a lot of guys might think twice.
15	I created the Detroit Police Memorial
6	Facebook page. I'm very proud of that. I'm very proud
.7	of that because I didn't want my heroes to be forgotten.
18	It's recorded that there's about 230 law
9	enforcement officers in Detroit that are killed. It's
20	more than that, trust me, I know, because most of them
21	have died from their injuries after they left this
22	department. I wonder if they had tasers, how many of
23	my friends and colleagues that I wouldn't have to stay
24	by their bedside or graveside. I wonder would my

friend Andre Barksdale because I would have liked to

1	finish that relationship, I wonder how would he been
2	here.
3	I approve of the tasers. If you don't
4	approve them, it will be a disservice to the men and
5	women and our shrinking numbers that the
6	responsibilities are greater. You know, they deserve
7	it for the officer's health, safety and welfare. You
8	know, I met a lot of people in my past and meeting the
9	Chief of Dallas was huge. He said it best. Society
10	has seemed to dump every problem on law enforcement
11	officers without giving them the proper funding,
12	support and resources. You have the chance here to
13	give these men and women the proper tools so they can
14	go out there and make a difference for you. Again,
15	they don't want to hurt anybody. Trust me, they're
16	running because they get a 911 call. Thank you.
17	CHAIRMAN BELL: Thank you. Open it up to
18	Commissioners. And we're taking 20 minutes or 10
19	minutes for the Commission. 10 minutes for the
20	Commission. I would hope they be on point and respond
21	to the Q & A in the proper timeframe. I do want to
22	acknowledge the DPOA president, Mark Diaz. Is he still
23	here. Mark, thank you for you coming out, your
24	attendance. Thank you.
25	A.C. WHITE: Mr. Chair?

_	CHAIRMAN	BELL:	Yes,	sir.

A.C. WHITE: If I may, I would like to take a
moment, and I apologize for taking off of the order of
business, but it would be irresponsible for me not to
respond just for a moment, and this is not a rhetoric,
it's just a reaction to a couple things that were said
today. And certainly, I appreciate everyone's passion
towards this issue, and this is exactly what we should
have when we have these types of discussions. But I
think it's also equally important that we frame the
subject matter appropriately. What we're talking about
is the deployment of weapons, and certainly affirmation
of values is one of the things that was said today,
which is very important. And notwithstanding that, the
fact of the matter is, the deployments of this weapon
is not an affirmation of value portion of what we do in
policing. We have Neighborhood Police Officers here.
Can they raise their hand, please? And we have a
number of programs that are designed to reach out to
the community. And as a couple of the people said
today, we don't have, thank God, the issues that some
agencies have because of our officers who go out there
every day and every night, engage our communities. The
work that Commander Barren does at protests. And I
don't know if you look at the engagement and the

1	patience that is employed with our SRT. And you also
2	have to take into account that we were under a Consent
3	Judgement for approximately 11 years with 172
4	requirements that we had to meet. There was no smoke
5	and mirrors in that completion of the Consent
6	Judgement. We are a more transparent department with
7	the help of this Board as well as the Officer of Chief
8	Investigator, you know, we react and respond to our
9	community.

One of the things that was said that gives me a bit of concern is -- well, actually there are a couple, but I'll just stick with one in particular, and that's this notion of dry stunning. Our policy, and we've already drafted a preliminary policy that says hey, if we were to go down this road, what would it look like. One of the things that we will strictly prohibit is dry stunning. There's just no need for that.

The other thing is that was talked about is this notion of using this weapon, and I'll call it electronic control weapon because Taser is a company, much like Bondo is a company and the product is putty, it's not Bondo. Taser is the company that produces this electronic control weapon. There are two major companies that if we were to go through the procurement

Page 41

process we would look at. The electronic control
weapon would be used by way of our force continuum. So
this wouldn't be an arbitrarily deployed weapon where
people would just walk up to folks and get them out of
their car by virtue of using this weapon. We would use
our force continuum, which we have consistently in my
career, and those people who violate it will be dealt
with individually.

And lastly, and I will be quiet here in a second, when we talk about the force continuum, I think the audience, the Board needs to understand, there are a lot of options available to officers today that are much more aggressive than the appearances of the taser weapon. For example, you know, you start off with officers present, which is our force continuum, meaning officer shows up. Some people look at the officer and say okay, the police are here, let's stop. Verbal commands. Officers can say hey, stop. Some citizens will stop.

But then we move into our soft techniques, which are our pepper spray and our tape or our come-along, and then there's the hard techniques, which are our strikes. PR-24s, which for the audience's purpose, is a weapon that is basically a metal nightstick. You pull that metal nightstick out, you

deploy it and you are if you're in the force continuum,
this person is giving you active aggression, able to
swing that stick, and if you are using it in compliance
with your training, however, because you are in a fight
and people aren't standing still and you miss the area
that you are trained to hit and you hit someone in
another area, as long as you are acting in good faith
to deliver a strike as trained, you are not held
responsible for excessive force.

So, as we talk about these things, we have to understand that there are a lot of weapons that the officers have that increase the likelihood of injuries to the citizen as well as the likelihood of injury to the officer.

So I just wanted to make sure that we framed the four corners of the conversation appropriately, because to say or for me to sit here and hear that we would dry stun citizens and cause heart attacks and things such as that would be irresponsible. And certainly, fighting with an officer, with a heart problem, could cause a heart attack, but we hope to never engage a citizen with a weapon much like the weapons we have on our hip. I have 43 bullets on me right now, okay? And I have in 21 years in the Detroit Police Department haven't had to use one of them, and I

9/8/2016

	Page 43
1	hope to retire having never shot one bullet. That's my
2	goal every day. And I hope if and when we get tasers
3	to never deploy it.
4	None of these officers that work hard every
5	day and night feel that we're better than our
6	community. We have the absolute privilege of upholding
7	the United States constitution and we do so
8	respectfully and professionally and what we're asking
9	for is a weapon to lessen injury to the officers,
10	lessen injury to the community and to show this
11	community as we have in the past many years that we are
12	partners with them. It is not us against them. So
13	thank you.
14	CHAIRMAN BELL: Now we give the Commissioners
15	the opportunity to respond. So if you have a question
16	or a comment. Hopefully you have a question for the
17	panelist that we can hear them directly and identify
18	the panelist in order to respond. So this is your
19	time.
20	COMMISSIONER MOORE: Through the Chair?
21	CHAIRMAN BELL: Yes, sir.
22	COMMISSIONER MOORE: First of all, I would
23	like to thank the community and the panelists for
24	coming out this evening.
25	Just a point of clarification to you,

	Page 44
1	Assistant Chief White when you mentioned empty hand
2	tactics. Could you say that again. Would you give an
3	example of empty hand tactics.
4	A.C. WHITE: So there's a number of tactics
5	in our force continuum. First, there's officer
6	presence, verbal commands and then there's soft
7	tactics, which are basically come-along techniques
8	where you put your arm out, grab the person's arm or
9	you put them in what's called a goose neck. Rather
10	technical, but pretty much grabbing their wrist and
11	bringing them along with you.
12	COMMISSIONER MOORE: So more like a pressure
13	point?
14	A.C. WHITE: We do use pressure point control
15	tactics, infraorbital, common peroneal, brachial plexus
16	strikes. There's a number of different techniques that
17	we use.
18	COMMISSIONER MOORE: Now the strikes would
19	you consider hard?
20	A.C. WHITE: Yes. That would be a hard
21	technique. That would be a brachial plexus strike,
22	what looks like to a citizen a punch.
23	COMMISSIONER MOORE: Right. Exactly. Okay.
24	You mentioned that there's a preliminary policy already
25	developed for the taser, Assistant Chief?

1	A.C. WHITE: Yes.
2	COMMISSIONER MOORE: Have you or any
3	executives visited Taser International?
4	A.C. WHITE: Yes.
5	COMMISSIONER MOORE: Can you tell us about
6	that trip?
7	A.C. WHITE: A number of years ago they came
8	out. We took a look at Taser International. They came
9	here, we went there. We looked at their technology.
10	We looked at the weapons. They walked us through how
11	they build a weapon, the reliability of the weapon what
12	we were very concerned about was the camera system that
13	comes with the weapon because in the newer tasers now,
14	they're able to if we were to get them, we would
15	want the one with the camera so you're able to see what
16	the officer sees from their point of view right before
17	they deploy the weapon. It was a very good and
18	beneficial trip.
19	COMMISSIONER MOORE: And who paid for that
20	trip? I need an answer to that question. Who paid for
21	that trip?
22	A.C. WHITE: I'm sorry?
23	COMMISSIONER MOORE: Who paid for that trip?
24	A.C. WHITE: Taser paid for it.
25	COMMISSIONER MOORE: In closing, were there

1	any visits to any beanbag companies?
2	A.C. WHITE: No, not to my knowledge on
3	visiting beanbag companies.
4	COMMISSIONER MOORE: What about pepper
5	grenades, rubber bullets, heat rays?
6	A.C. WHITE: Not to my knowledge.
7	COMMISSIONER MOORE: Okay. Thank you.
8	A.C. WHITE: It could have, but not to my
9	knowledge.
10	COMMISSIONER MOORE: Thank you.
11	CHAIRMAN BELL: I would hope that the
12	Commission would focus in on the panelists because the
13	Department wants to get more of an opportunity to speak
14	to this issue, but we want for the community to have
15	the opportunity and the Commission so if you could
16	focus in on the panelists, that would help us out.
17	COMMISSIONER MOORE: One closing question,
18	Mr. Mark Young. You mentioned that retiree healthcare
19	was taken away. Who took that away?
20	MR. YOUNG: It was taken away during the
21	bankruptcy through the Emergency Management process.
22	CHAIRMAN BELL: Yes, sir.
23	COMMISSIONER CRAWFORD: Yes, sir. Through
24	the Chair. I want to thank everyone for their
25	attendance here. And those on the Commission know that

L	every time this discussion came up recently at the
2	table several times, I was a real advocate of the
3	community coming out and participating, and I liken
4	this forum in the spirit of Ron Scott from the
5	Community Coalition because years ago when Jerry Oliver
6	was Police Chief, I was in communication with Ron
7	Scott, Sandra Hines, and Mr. White here and contributed
3	the information and research on the issue of the use of
9	tasers.

Couple fast facts and stats here. Amnesty
International in 2001 to 2008, 351 people were killed
by the police using tasers in the U.S. From 2009 to
2015, 283 people were killed by the police using tasers
in the United States. That's a total of 634 documented
taser-related deaths in American, 634.

Also too, from 2009 to 2014 42% of related deaths in America, America by -- with the use of tasers by police were black people. That's 42% according to the stats in 2014, make up only 13.6% of the population. By far, most of those killed with the use of taser were black, people of color, Latinos and people of color.

Also too, the Fairfax County Virginia

Sheriff's Department has banned the use of tasers after
the result of a death in their jail. Memphis Police

1	Department, San Francisco banned the use of tasers.
2	Charlotte, North Carolina pulled all the tasers off the
3	street. Nevada, I believe it's Las Vegas, Nevada
4	revised their taser policy to be more in line with the
5	ACLU proposal. Also I was going to ask the ACLU for
6	their position.

I have a question for Mark Young. In January of 2015 sitting at the Commission table, and I suggested this several times, and asked a question where is the data in terms of the increase in assaults on police officers. I haven't gotten it. Every week sit at the table I hear the stats on crime. Crime is down. Crime is down. Never heard of any stats, particularly -- well, I hadn't asked the DPOA, but I'd like to hear the DPOA if they can bring forth some numbers. They may need some time to get it together. But what is the increase on assaults on police officers in the City of Detroit? You know, I've heard stuff about national, what's going on national. understand what's going on national with, you know, some of the assaults and even the killings of police officers, but I'm talking about Detroit since I've heard this comment Detroit is different. So and also too, in asking that, in January of 2015, this is something that came out of the Whitehouse from

1	President Obama. The Justice Department meeting with
2	the Chief of Police and across the country was that
3	they tracked and started to submit the stats of the
4	federal government in terms of all the assaults, be it
5	physical, weapon, shootings, etcetera of police
6	officers. So we can start right here in the City of
7	Detroit

And in reference to one thing I omitted in Warren, I believe Mr. White said something about Warren PD they more or less gave the tasers back to the company. No? Yes, they did. But that was because of the civil litigation that Warren had to pay out in the lawsuit in the death of an African-American male who was 16-years-old some years ago. And Taser International as they stated, Warren stated, didn't back them in terms of, you know, what was going on with the trial and the litigation. So that's why today Warren PD is another of those departments that has banned the use of tasers. But my question was to Mr. Young in terms of do you have any data, sir, specifically to the Detroit Police Department as to there is this increase in assaults on police officers? And also, too, if there is, then I should be able to obtain some of this data from Wayne County Prosecutor's office that individuals should be prosecuted for

1 assaulting police officers.

MR. YOUNG: No. Right now, as I said before,
I don't have that data. But I can tell you this, that
I do represent some in individuals that were assaulted
by citizens in the City of Detroit, so assaulted so bad
that they suffered duty disabilities. And, in fact, to
follow up to Commissioner Moore is what I want to say
is yes. No, we don't have retiree health care, and
some of the injuries that these guys suffer was from
some assaults and from some of these incidents that
that intermediate weapon would have stopped. No. I
can say this to you soundingly, if one law enforcement
officer is hurt in the line of duty and a taser could
stop it, then it's done its job.

I got to make this other comment. Mike
Sauger, the president of Warren Police Officers
Association is my friend. In fact, we sat in Lansing
today at a meeting and I asked him why did they get rid
of tasers and he explained it to me. I asked him. He
told me that he wants tasers so bad for his members he
does not know what to do. He said the deployment of it
alone used to safe his members from some violent
contacts. It's not that the police officers don't want
them. In fact, the president of their association is
asking for them back.

1	COMMISSIONER CRAWFORD: Through the Chair.
2	Documentary I looked at called Killing Them Safely,
3	there was Warren Police Officers that were interviewed
4	and they said they did not want to I use a product
5	being the taser since they went back to their own
6	product. And these were police officers in that
7	interview from Warren.
8	So also to the doctor, the emergency room
9	doctor, I do understand taser has put out communiques
10	in terms of this and they're in some policies in some
11	responsible police departments across the country and
12	even in the jail in Wayne County, which I work as a
13	deputy. You can't taser a mentally ill person or
14	person that's mentally challenged. You're not supposed
15	to taser people on drugs. There's an issue also too
16	one's state of health in terms of hypertension, which
17	Mr. White made reference to, and heart disease and in
18	black communities in terms of one's health or state of
19	health and hypertension, heart disease and a number of
20	other issues disproportionately high opposed to the
21	general population. So to the doctor, in terms of
22	one's medical state of health, would you like to
23	expound on that, sir?
24	DR. DUNNE: Sure. If we look at the data

that's out there, as mentioned a number of deaths, and

many of those deaths have been investigated. And
certainly, it appears in a majority of them, either
there was some significant preexisting disease or there
were drugs on board, either prescription drugs or other
drugs that led to a very stimulated state what people
kind of refer to as agitated delirium. It's not
actually a diagnostic criteria, but it's a description
of a patient's condition. And there are also a number
of deaths that they did not find any preexisting
disease, and that's where some of the estimates in the
medical literature, and again, we're without controlled
studies, obviously, in any of these things, so the best
you can do is look at what's actually occurred. And
this is just as true of the other less lethal weapons,
a baton and there was some mentioning of the use of a
baton and a person moving, and certainly batons have
resulted in injuries, some of them unintentional where
an officer was using it clearly in the way they were
trained and the person moved or was injured a different
way. Any one of these things can be lethal.
So that's where the estimates, and the
estimates vary pretty widely. I mean honestly, just

looking at the data that's out there, there's an

conducting energy weapons, again, not just tasers, but
other brands as well resulted in the death of the
victim. So there is some guidance on that about
avoiding many of those things that you mentioned are
very difficult to know prior to the deployment of that
weapon.

One of the other things that is discussed in the literature is that, obviously, properly deployed weapons that are designed to be lethal essentially could kill a hundred percent of the time if they're designed that way. So there is -- people have mentioned the continuum of force, but there's a continuum of injuries associated with the various techniques that people have mentioned here.

COMMISSIONER CRAWFORD: Thank you, sir.

COMMISSIONER MALLETT: Chief, if you have done this work for decades and are probably as familiar as anybody in the room about training techniques that are used to prepare men and women to do the very difficult work that they are called upon to do. As you think about weapons of this type, and as Dr. Dunne explained it, all of these weapons are potentially lethal. So as you're thinking about it, do you believe that Detroit Police Officers now don't have the range of equipment necessary to do the work based on the

training that we provide, because I really do think
that, and if you listen to Sergeant Young, and I could
assure you Sergeant Young, that nobody on this
Commission wants any officer associated with Detroit
Police department not to have what he or she needs. So
the question really is, is do they really need it. And
as we are approaching this kind of decision, where in
the training regimen would you, Chief, responsible for
evaluating the training that these men and women get?
Where do you put this weapon? Is this going to be a
step forward? Is this going to make the Police
Department more effective in the work that they do, or
is this going to regard the forward progress that we've
been able to make, or is it just one more thing that
we, you know, is really not going to have the positive
effect that people might think?

CHIEF McKINNON: Mr. Mallett, that's a great question. I wish there was a correct answer because in all the years that I've been around we see things that we hope that that's going to be the solution for what we need. In the continuum force assistant chief was talking about, if you look at that and you've gone through that continuum of gets to a strike, that can be ugly. And when you see that, you say my God, you know, what did this police officer do to get this person, but

9/8/2016

	Page 55		
1	it's the continuum force. So that's one then. But if		
2	you get into something else, we have, and I go back to		
3	this again, Commissioner, we have to make sure, number		
4	one, that everybody is effectively trained, and I think		
5	Mark has mentioned this. We have to make sure that		
6	everybody's effectively trained.		
7	I've used, whether it is a beanbag or is gas		
8	on me, and those things are effective for me. But		
9	let's look at the liability that goes along with those		
10	things. If, in fact, something happens to a person		
11	whether it's hit the heart, the Doctor can tell you		
12	more about this than I, there's that liability that		
13	goes along with that. We have to get the most		
14	effective tool possible to assist the officers of the		
15	City of Detroit and in all the years that I've been		
16	around, I like the way you say decades, that's		
17	absolutely true.		
18	COMMISSIONER MALLETT: Well, you said 1967,		
19	Chief. I just did the math.		
20	CHIEF McKINNON: I started in 1965. Back in		
21	those days, I mean after he babysat me. Back in those		
22	days, there was no training. There was absolutely no		
23	training. And so we've come I mean millions and		
24	millions years ahead of that. But we have to look at		

the best and most effective way to make our officers

9/8/2016

	Page 56
1	safe, and secondly, to make sure that they use the best
2	tools possible. I think that this is going to be an
3	evolving situation for us.
4	We don't know whether, in all sincerity, what
5	the final solution is going to be because someone's
6	going to say well, you know, that's not the best way to
7	do this. Maybe we can use something else. Let's see.
8	There's a spray gas or something like that that will
9	immobilize the person. Right now I don't think anybody
LO	knows for sure because everyone's going to, of course,
1	think that their tool is the best one.
12	You know, I trained hard to learn how to
L3	protect myself and I was effective with that, but I
4	think that what we have right now is a situation where
15	anything that someone uses could be detrimental to law
16	enforcement, could be detrimental to the community.
17	And so we have to do everything that we can to learn
18	whatever it's going to be to be effective for our
L 9	officers and make sure no more of the Baltimore and
20	Ferguson.
21	MR. YOUNG: I would like to follow-up on
22	that. First of all, it's better to have and not need.
23	That's number one for law a enforcement officer. And I

24

25

think that that is crucial to them. So here's the

other piece. Detroit has done a phenomenal job of

2.2

deescalation, conflict management, conflict resolution
with the citizens. That shows. Anytime that you can
have a protest here and you don't to have shields,
helmets, riot batons and things like that. We've done
a phenomenal job here. But we have to also brace
ourselves for what potentially can come.

I can tell you this, that there's been thousands and thousands of taser deployment and it's not been a big deal on the news. I guarantee you that if I walk out this building and had an encounter with a perpetrator and I fired on them, that every camera footage around here would show that on the news.

There is no silver bullet. There is no perfect bullet. But I will tell you something, you have an obligation to the men and women that you send out here that's in a limited capacity to arm them with the best tools available. I reiterate this. I know of no one that wants to take anybody's life. Everything changes. I'm not the same Mark when I walked into this door with my wife or my kids. I'm not the same Mark my futures, my goals. I can tell you this, every law enforcement officer I know involved in a shooting, they've had nightmares, posttraumatic stress disorder, cold sweats, insomnia and the rest of that. I bet they don't do that when they have a taser pointed at them,

because they pulled those prongs out, and if the
perpetrators went on to jail, listen, I wish that there
was some perfect, that's why you have brave men and
women go out there every day.

COMMISSIONER MALLETT: Well, but see, Sergeant, here's the problem. The problem is is that what the Commission needs is really an analytical tool, right? We need to understand, Mark, how to make this decision. It can't merely be made as passionate as you are and experienced as you are, and you have experience I will never have and respect all that you have achieved. Your anecdotal advice to the Board is not going to be a firm enough basis is for us to make a decision. So really, when I was asking the Chief about the training, I'm trying to figure out a way for us to stand in front of a general community and say, this is how we made this decision and this is why we made that decision. So we are clear that there are some persons on the Police Department who believe based on what they've read or experiences that they had that tasers would be better, but that's anecdotal. It's very difficult to make a decision based on anecdotal evidence. So what Commissioner Crawford has asked for is a data point that perhaps could form a foundation for us making a decision pro or con. The things that

Pac	те	5	9

1	Dr. Dunne have talked about in terms of the injuries
2	associated with the use are very important. And I do
3	think that one of the questions that we've got to
4	figure out in terms of the training that the men and
5	women of the Police Department get, where does the
6	taser fit on the force continuum? How would it be used
7	and does it, does it, for instance, would it come in
8	the training manual in the force continuum before the
9	baton? Does it come after? So and so there's lots of
10	permutations to this and you would say it would come
11	before the baton.
12	MR. YOUNG: I would say before the baton
13	because if I deploy the baton, there's a stronger
14	likelihood of injury.
15	COMMISSIONER MALLETT: For the police officer
16	and the
17	MR. YOUNG: And I'm trained with PR-24. If I
18	hit a person with a PR-24, there is a great likelihood
19	of injury. The PR-24 it's a long metal pole with a
20	handle on it. I can tell you this, if I hit you with
21	that PR-24, chances are, you are going to the hospital.
22	I've seen people get tased and they didn't.
23	CHAIRMAN BELL: If we can move, I'd like to

really give the community, that's why we're here to

give the community an opportunity to give us feedback.

24

1	I did see one more hand up so we can stop on that note.
2	COMMISSIONER DEWAELSCHE: If I may, please.
3	I look at this taser as an alternative to shooting a
4	gun. I mean anything that will prevent an officer from
5	having to use a gun to shoot somebody to stop them from
6	injuring or hurting them or hurting someone or
7	committing a crime is an alternative. It means that
8	that person, the chances of that person dying are going
9	to be a lot less. That's how I see it.
10	You know, there are a lot of statistics that
11	we can get to see how severe or how much worse, you
12	know. I copied down the numbers that Dr. Dunne, gave
13	one in 10,000 uses, one in 100,000 uses. That is very
14	minimal when you consider that that person could have

been shot and killed. You know, that's what I'm
looking at. To me, it's an alternative. Anything that
is an alternative to a gunshot is safer, in my opinion.

CHAIRMAN BELL: Thank you, Commissioner. At
this time, we really want to open it up to the people
that's here. Do we have any cards or we just going to

that's here. Do we have any cards or we just going to have them come. Please, if you want to speak, come to the mic now, the podium right there. I would just ask that you be specific. We had quite a few commentary from the Commissioner, but I would hope that we could

frame a question for the panel and your concerns will

4	-			_
	he	addressed.	Yes.	ma'am.
_	200	adar cobca.	± C D ,	ma am.

MS. SMITH: Hi. My name is Rita Smith. I
live here in the 3rd precinct. I've been coming to the
monthly community meetings for over 20 years. So I'm
one of the ones that work with police on a regular
basis and I want all of them to come home as well.

Now, this meeting was billed as a less-than-lethal weapons discussion, but the only thing we've talked about P is CEW's or tasers. We haven't talked about anything else, so I'm just wondering, are we considering anything else or are we only considering CEWs? Because the only thing I've heard is about tasers. I haven't heard anything else. We haven't had another discussion about any other weapons. So if it really is about less-than-lethal weapons, why aren't we discussing anything else if we're only considering the tasers, maybe it should have been billed that way so we would have been able to do some research on our own on the one item and come here. Okay.

Secondly, I just wanted to say, this is just a comment. They were saying that this is worse for people who are in -- who have stimulated problems or whatever. Okay. So everyone, if you're encountering a police, aren't you going to be in that kind of situation? I mean aren't you going to be in a

1	stimulation situation? I don't see where you're never
2	not in that situation if you're facing a cop if you're
3	fighting or whatever and so forth.
4	But secondly, and, you know, they quoted
5	stats about how many people, you know, people of color
6	that have been tasered and stuff. We're in Detroit.
_	

It's going to be 80 to 90% black folks so that stats
doesn't meaning anything to us because we're a black
city for the most part, okay? So I just thought I'd
throw that out when we're considering stuff.

CHAIRMAN BELL: Thank you, ma'am. I appreciate that.

2.2

MS. DRINKARD: I'm Peggy Drinkard and a resident of the city. Sergeant Young mentioned pulling the taser out and hauling them off to jail. Regarding the preliminary protocol for taser use, if a person is tasered, will the person be transported to the hospital by ambulance for removal of the barb and evaluation and monitoring until they're medically cleared? And if so, I understand this would be paid for by the City. Is that correct?

A.C. WHITE: That's correct. That's a very good question, and yes. Preliminarily our policy would include if you are tased or whatever electronic weapon we use, you would be transported by EMS to have the

1	prongs	removed.	We	would	not	remove	them.
	PICHGD	I CINO V C C.	** -	WOGIG	1100	I CILLO V C	CII CIII •

MS. DRINKARD: Okay. One thing I've found
rather remarkable, and I think some cities could come
to study us is, for instance, I'm retired from Detroit
EMS and stood by a variety of barricaded gunmen
situations and no one ever the police never fired
any shots. They may have shot some teargas in but
there weren't any guns fired and there was a protocol
and it was very disciplined, rigorously followed and
situations were resolved without a big commotion. And
I don't know statistics, how many citizens have been
shot by the police. Do we really do that very often in
Detroit, and it's my impression that that is not true;
that we're a sophisticated enough police department to
our credit, I think, that that doesn't happen very
often. And I guess a question for Sergeant Young, are
there any statistics pre and post taser use of police
department personnel as far as change in the rate of
injuries on an officer's part?

MR. YOUNG: Without having stats in front of me, I would tell you that's a resounding yes. I can tell you that since they got tasers, I'm sure that a lot of officers around this country, I think a lot of people would agree with me have not gotten injured or disabled in some close quartered instances. I can tell

Page 64 1 you without having stats in front of me, that's a yes. 2 MS. DRINKARD: But do you have published 3 research? MR. YOUNG: We can get that. I'm sure that 4 5 wouldn't be hard to obtain. 6 CHAIRMAN BELL: Thank you. UNIDENTIFIED SPEAKER: Good evening. I'm a 7 8 member of the Morningside Community and I have a black 9 male who is 26 years old. I have a son who is in 10 constant contact with the Detroit Police. He has been had weapons, guns pulled on him multiple occasions, 11 12 constantly pulled over. And I wanted to know, Mr. 13 White, what is the training protocol because 14 immediately, almost on every occasion, their weapons 15 are drawn? Mind you, my son is huge. He's 6'7". He 16 weighs 300 pounds, but he's not a criminal and he does 17 not carry a weapon. I make sure he doesn't carry a 18 weapon. Only thing he has is his camera and his cell phone. But every instance he's had a weapon pulled on 19 20 him. He had a weapon pulled on him in my front yard. 21 The officer thought he had a AK-47. My son has a 2.2 paintball gun. A paintball gun has a tube on it so you know it's not an AK-47. It's red or orange or green or 23

So I wanted to know, you mentioned this

some other color.

24

9/8/2016

	Page 65
1	training protocol of the force that they're supposed to
2	use. So how do you I mean because I've never had an
3	officer say stop, you know. He's never incurred that.
4	They automatically either put their hand on their
5	weapon or draw their weapon, even at a traffic stop.
6	So I'm paranoid every night.
7	CHAIRMAN BELL: Assistant Chief, briefly
8	respond. She's talking about training, but we're
9	trying to get specific questions in.
10	UNIDENTIFIED SPEAKER: That's the specific
11	question. If that is the training why, is it
12	constantly their hand is on their weapon or the weapon
13	is drawn on every instance, in every occasion.
14	A.C. WHITE: Well, the hand on the weapon
15	certainly is officer discretion. Now, drawing the
16	weapon, there are some protocols in place for drawing a
17	weapon. Some of the things that we have in place,
18	there has to be a reasonable fear of officer safety.
19	But without knowing the specific circumstances involved
20	in your case, what I'd like to do is just talk to you
21	about it off line in the interest of time because there
22	may be something specific to your case that I really
23	need to get into a little bit more. So if you could
24	UNIDENTIFIED SPEAKER: So it's at the

officer's discretion.

1	A.C. WHITE: Well, if you talk about hand on
2	weapon, there's a lot to that, so I'd really want to
3	get into exactly what you mean. Some officers, they
4	approach a vehicle, they may put their hand on their
5	weapon. But drawing a weapon and hand on weapon are
6	two different distinctions that I want to make.
7	CHAIRMAN BELL: Thank you.
8	CHIEF McKINNON: Can I say something? You
9	know, it's a long time I've been around, Commissioner
10	Mallett. I would put my hand on my gun when I'd stop
11	people back in the '60s and I would talk to them in
12	such a way, understand, listen, you know, I don't know
13	who you are. I don't know what you were doing, but
14	this is what was occurring. And as I talked to them,
15	they understand what I was doing and there was never a
16	complaint about it. I didn't try to do anything wrong,
17	but when you're stopping someone, 2, 3, 4 in the
18	morning and it's dark, you just don't know. So the
19	officer is preparing himself for whatever it might be.
20	He might not be wrong or right. As Assistant Chief
21	said, that's a discretionary situation. I did that and
22	it was never any intention to offend anyone, but I
23	wanted to make sure, again, that I was safe. And it

25

never came out.

1 ma'am.

PASTOR GRIFFIN: Good evening. Pastor Yvette
Griffin, Pilgrim Baptist Church. I have a daughter
who's on the job for eight years. I have two
goddaughters who are currently on the job, meaning that
they are DPD officers and so I'm very close to the
police officers. However, I want to talk about the
current tools that are being used that are on the belt
right now, because those that I know had to retire from
disability because they were carrying a heavy gun, all
those bullets, the handcuffs and everything else. So
that's something that we need to talk about because
currently you have people on disability because of
those things.

Now, my questions are this. Are they bringing a taser to a gunfight? How do you know who is a mental health patient or person or a person with high blood pressure or hypertension? Those are some of the questions that we need to ask. And then I want to talk about this young man here, another Mark, when he talked about the black-on-black crime where we are killing off each other in the City and how, what you can do, we can do as the Police Commission to resolve that and decrease that because there's some things that we can do.

1	Yes, the NPO's are helping because they're
2	dealing with, in our neighborhood they're dealing with
3	a training and training young children about the
4	relationship between police officers and the children
5	and families and the children, yes, but there's some
6	other things that we need to do in terms of tasers.
7	Talking about tasers that we need to talk about how
8	we're going to reduce this black-on-black crime because
9	right now, I thank God for the Police Department. DPD
10	has come a long way. I'm really proud of them at this
11	time, but I want them to be more proactive and to work
12	with us on what we're going to do to help these
13	families because right now, everybody's looking at the
14	church for us to do stuff too. We don't have the
15	resources that you have. We're dealing with trying to
16	deal with Gary Brown and the water. So but how are
17	you we need to we're in the same position as
18	clergy. Everybody's looking at us to do something, but
19	we need this body to help us with this black-on-black
20	crime. We need to focus in on that because I think you
21	have something going on, Mr. Mark, about decreasing
22	that to help.
23	CHAIRMAN BELL: Ma'am, we would be here all
24	night long if we take that subject.

PASTOR GRIFFIN: Okay. So are you bringing

1	the taser to the gunfight?
2	COMMISSIONER BELL: No, we're not.
3	PASTOR GRIFFIN: And how do you know who is a
4	mental health patient?
5	COMMISSIONER BELL: We don't know. We don't
6	know. Next question. If you can be brief but we're
7	not going to get into black-on-black crime.
8	MR. FANCER: I think so much depends on the
9	vision and the attitude that the department brings to
10	these situations. One of the reports that we got
11	concerned a fight between two 15-year-old girls, all
12	right? They were throwing down at a school. The
13	police officer's response to that was to use a taser on
14	them to separate them. Now there are options there,
15	all right? In a different era, two girls fighting,
16	teenage girls fighting, that a male, whether he's a
17	police officer or not, is going to work through that
18	situation. First. He's going to physically separate
19	them. I think that there is a way to separate teenage
20	girls from fighting. And secondly, get to the root of
21	the problem and to try and resolve the conflict and the
22	contradiction to affirm their value and their worth.
23	If the attitude of law enforcement is that
24	we're going to avoid getting injured at all costs,
25	we're not going to wade into these kinds of situations

	1390 /
1	because we might get roughed up, and instead of that,
2	we're going to use a taser in order to take care of
3	this issue, you're never going to get to the point
4	where you're going to have a constructive dialog with
5	the people who are involved in a schoolyard fight.
6	You're never going to get to the point of talking to
7	them about their value and their worth and their
8	options of life and to resolve the root of the problem.
9	And so a lot has to do with vision. Yes, I
10	know the police officers want to be as armed as well as
11	they can with all things that are available to them to
12	protect themselves, but where is the limit. Where is
13	the line. Is there any departments that have tanks.
14	They have military equipment. And yes, those officers

19 COMMISSIONER BELL: Thank you, sir. Yes, 20 ma'am.

and military force.

may walk around feeling safe but they destroy the

relationship that can develop between them and the

community because of how they're perceived as occupiers

15

16

17

18

21

2.2

23

24

25

MR. CHARLES: My name is Charles. I live in the 3rd District and I have a comment/question for Sergeant Young. I feel like a lot of what you said is very passionate. I understand it was presented as a false dichotomy in the sense that it's either the taser

or gun. If the conducted energy weapon is a less
lethal weapon, it would be somewhere, it would be
placed with other less lethal weapons on the force
continuum. So I don't see how it would actually
prevent the use of a gun unless you're going to say
that that is the last resort before the use of a gun.
And obviously, most reasonable minded people would say
yes, we prefer than officer to deploy their conductive
energy device as opposed to a firearm, but what do we
do when they start using that in lieu of other less
forceful actions. And there is research to suggest
that has happened in other departments where the taser
then becomes the default mechanism for situations where
they otherwise might have used a come-along or some
other soft tissue technique.

The second point is that with regard to injuries, research also suggested in some agencies that some such injuries have actually increased because of this issue having transport to the hospital to have the prongs removed. And my question to you is how are we going to deal with or are you prepared to deal with the issue of officers over relying on tasers in lieu of less coercive and forceful means?

MR. FANCER: My response to you would be that there is a force continuum, there is force continuum in

1	place. I'm sure we have a great Assistant Chief that
2	would make sure that that's in there. You're right,
3	one of the concerns to place accurately, I would not
4	want the men and women that I represent or the men and
5	women of this Department to be complacent because of
6	the taser. What I want is an intermediate weapon for
7	the members so they can make sure, listen, the hard
8	hands and all of that stuff, when you talk about
9	somebody 6'7", 340 pounds, their presence alone
10	sometimes is frightening. The reality of it is it's a
11	tool to have. Most law enforcement officers every day
12	go out there and make decisions. And guess what, they
13	do try to deescalate. They do. We hope that our
14	presence alone on the scene deescalates. Sometimes
15	that doesn't happen that way, unfortunately.
16	There is a force continuum. And you're
17	right. I don't want my officers or members I represent
18	to be complacent because they have a taser, a handgun
19	or anything on their waist.
20	A.C. WHITE: Could I add to that too? We
21	have a management awareness system that tracks
22	officer's behavior. So the tools that they have at
23	their disposal now are managed through that management
24	awareness system so if they're relying on any

technique, the supervisors are able to monitor the

Page 73

1	officers, take corrective action.
2	As it stands today, the officers are
3	supervised on a ten to one ratio, supervisor and
4	officer. So my ten officers that I know report to me,
5	I manage their force from the standpoint of seeing how
6	often they use it, and I compare them to like officers
7	to see if we have an officer who has fallen out of the
8	norm, so to speak, in their use of force and then that
9	officer is grilled and talked to.
10	CHAIRMAN BELL: Sir, no. I'm sorry. We're
1	going to entertain the next question. Thank you.
12	MS. BROUGHTON: Theo Broughton from Hood
13	Research. I'm glad there's a big turnout this evening
4	To retiree McKinnon, if I remember right, there was a
15	test at Greater Grace with a taser. I don't remember
16	any hooks in your skin.
L7	CHIEF McKINNON: I didn't do a test at
18	Greater Grace.
19	MS. BROUGHTON: So you didn't do a test at
20	all.
21	CHAIRMAN BELL: Chief Oliver, my
22	understanding.
23	MS. BROUGHTON: Even though you say that
24	people get killed with bullets, there are people who

have been shot with bullets who did not die. Tasers do

Page 74

1	kill. There were six young men in Mississippi all
2	teenagers, young adults, six of them murdered with
3	tasers. Police department. You can check that out.
4	My concern is officers like Brown, the people who might
5	use them to torture the young men in our community, I
6	don't see that those tasers that you all seem hell bent
7	on getting them would be carried by those who are in
8	downtown or midtown. They have multi layers of
9	officers, however. Our communities need to have more
10	than a concern about tasers. They need to have more
11	education as it relates to deescalation, as someone
12	else has said. Someone should be able to tell me the
13	weight of this one that you are considering. Someone
14	on the panel should be able to tell us whether they
15	will have cameras on them. It has been suggested, but
16	I have not heard any definitive answer on that. And
17	the third question is, what is the pulsating of the
18	electronic weapon, as you call it, made by Taser or
19	whatever other company you use? Will it operate like a
20	repeating rifle or will it be one shot, and you stop
21	and how many volts?
22	CHAIRMAN BELL: Ma'am, we haven't taken any

CHAIRMAN BELL: Ma'am, we haven't taken any position in reference to utilizing the weapon at all, tasers. We just wanted to have a discussion because we've been informally talking about it. This is the

23

24

	Page 75
1	first step. So that's why we're here this evening is
2	to get response in terms of questions.
3	MS. BROUGHTON: Somebody should be able to
4	tell me the weight of one. The research has been done.
5	COMMISSIONER BELL: We don't have any experts
6	in that area that I'm aware.
7	MS. BROUGHTON: But you have people who have
8	gone to the company.
9	COMMISSIONER BELL: No, ma'am. We haven't
10	gone anywhere.
11	MS. BROUGHT: Really?
12	COMMISSIONER BELL: If you can respond
13	briefly.
14	A.C. WHITE: Through the procurement process,
15	ma'am, when we get ready to make a decision on this
16	electronic weapon, we will put out a bid for the weapon
17	and they will come in with exactly what the weapon
18	delivers. We will submit it to this board. I do not
19	have that information right now.
20	MS. BROUGHTON: So the preliminary research
21	that you have done, you don't want to release right
22	now.
23	A.C. WHITE: Well, we look at the weapon
24	itself. We've worked on how would we look at the

department with the weapon. We looked at other

9/8/2016

	Page 76
1	agencies that currently deploy the weapon. But we may
2	not end up with a taser weapon. We may end up with
3	another weapon that provides the same service.
4	MS. BROUGHTON: Cameras on it.
5	A.C. WHITE: Well, I will tell you that a
6	camera is a must if we were to deploy the weapon so
7	that is the only benchmark that is required at this
8	point is a camera.
9	MS. BROUGHTON: On the weapon.
10	A.C. WHITE: On the weapon.
11	MS. BROUGHTON: The body cameras still have
12	not been distributed as has been promised. I attend
13	these meetings and sure some of you know.
14	CHAIRMAN BELL: Thank you. Commissioner
15	Burton.
16	COMMISSIONER BURTON: I'm requesting that we
17	get a copy of the DOJ, Department of Justice, approved
18	policy of a use of nonlethal weapons such as tasers.
19	CHAIRMAN BELL: I don't know if there's such
20	a policy, but we can entertain that. Next question,
21	please.
22	MS. SMITH: Good evening. Bernice Smith,
23	political activist. A.C. Chief White, and to the
24	Commissioners and our guests. I have been very
25	observant in the newspaper and in the TV. Last week,

9/8/2016

	Page 77
1	as most of you may have noticed, there was an incident
2	of a prisoner escaping from down south somewhere and he
3	was caught in the suburbs, which was Royal Oak, or
4	whatever the case may be. There was no gun action by
5	shooting him. He wrestled with the police. In the
6	meantime, he got away and he had a hypodermic, some
7	kind of drug needle and he pointed toward the police.
8	It was three of them that ran down the area to get him.
9	So what I'm saying is and directing to the audience and
10	to Commissioners, I do have faith in our police
11	commissioners and in our police officers. I've been
12	one of their favorites for I don't know how long, since
13	Coleman days. But I want to let you know this past
14	Saturday I was invited or in a way I was able to go to
15	the Trump event, fiasco, really, and this young man
16	right here, Commander Barren, he was there in control.
17	The people were out there acting ugly and I was fearful
18	of my police officers and what they were going to do.
19	But with Commander Barron in control, there was no
20	incidents whatsoever and we should give him all the
21	kudos in the world. When police deserve it, I want
22	everybody to know about it because the fact they are
23	out there 24 hours a day risking their lives while
24	we're at home sleeping, all right? So I want you to
25	give them a break and let them do their jobs. And in

Page 78

1	the meantime, come to the Commission meetings if you
2	have any kind of complaints or whatever the case may
3	be, like I do. I thank you for your time.

CHAIRMAN BELL: Thank you. Yes, sir.

MR. BRISBANE: Commissioner Bell and the rest of the committee, my name is Harvey Brisbane, part of the DPAC and Michigan United. My portion is to the doctor and the question is what is the amount -- the heart goes through this QRS rhythm, correct?

DR. DUNNE: Correct.

2.2

MR. BRISBANE: So if the heart is at rest and the taser hits it and causes it to kick up, would that cause the person to die?

DR. DUNNE: So there have been some studies looked at this in animals, but as I mentioned before, unlike all our medical devices, there's no comprehensive study. They haven't looked at this on thousands of people. So what we know about what's out there is somewhat contradictory where they have had folks who voluntarily got tasered as part of training who were willing to stay on a monitor and get an EKG done and most of them showed no change in their heart action. In general, and again, I'm at fault for using the term taser when I should be talking about a conducted energy weapon, they're not all taser products

1	that are looked at when they're looking at these
2	things. And there are other cases where there appeared
3	to be abnormal heartbeats caused. The weapon is
4	designed to work on the muscles and peripheral nerves
5	on the surface of the body, which is, as I believe Mark
6	mentioned, one of the warnings that the company makes
7	that is somewhat challenging, depending on how well you
8	can aim it, is that if it is on a person where it
9	actually is putting a lot of energy through your skin
10	so if you're not very muscular or you're thin, and it
11	does appear that it causes some energy discharge in the
12	heart. Now that doesn't necessarily stop your heart.
13	We all have been exposed to energy at various times,
14	including even things like a bad static shock, but that
15	is what is considered some of the risks, and that's
16	where some of the estimate of a potential for
17	conductive energy weapons to cause that comes from.
18	MR. BRISBANE: So if the heart is at risk,
19	you can knock it out and take into defibrillation,
20	correct?
21	DR. DUNNE: It can cause an extra beat or it
22	may cause fibrillation, which is an abnormal beat that
23	doesn't actually pump blood.
24	MR. BRISBANE: Thank you, Doctor.
25	MS. SUROBY: Kim Suroby. And I'm really glad

1	that we started this conversation off with not us
2	against them, you know. It's really about
3	relationships. Being a retired teacher, I remembered
4	when we stopped being able to paddle students or spank
5	them.
6	CHIEF McKINNON: They didn't stop with me.
7	MS. SUROBY: But I say that to share with you
8	when, you know, spanking was immediate. You could get
9	the result you wanted. But what I found out is that it
10	didn't build relationships. And when we couldn't do it
11	anymore, and I should say when I couldn't do it
12	anymore, I had to transform. I didn't have that
13	spanking tool and I had to do something different, and
14	it made a difference. And you have to want that.
15	So I'm really torn about this because I know
16	it's challenging. I identify with police officers
17	being a teacher going through all that I did. But I
18	just want to say that having weapons I don't think is
19	the correct thing. We really need to work on some
20	alternatives, conflict resolution, what have you.
21	And then the last thing before I sit, I want

And then the last thing before I sit, I want to ask the Commission to have a workshop and I'm going to ask that you use Ron's book, Conflict and Police Brutality. There's a lot of suggestions in here and Ron was on both sides, to sit down with the community

22

23

24

9/8/2016

	Page 81
1	and let's figure this out. We have to figure this out.
2	This is about relationships. It's not about weapons.
3	There are no easy answers.
4	COMMISSIONER BELL: Thank you. Yes, sir.
5	MR. HARRIS: Bishop Daryl Harris, Ceasefire
6	Detroit. I grew up watching a lot of cartoons. One of
7	my favorite cartoons is the Roadrunner. Roadrunner
8	cartoon, you always get to see Wile E. Coyote putting
9	his best efforts after he leaves the ACME shop, buys
10	all this weaponry, buys all this stuff to catch the
11	Roadrunner. And gets this first thing, this catapult,
12	uses this catapult. He's right there. He's almost at
L3	the Roadrunner's neck, and then something happens.
L 4	Instead of him modifying what he already has, he goes
15	back to the ACME store, scraps what he has already that
16	almost got him to catch the Roadrunner and then he buys
17	something totally new.
18	I just want to go back to Commissioner
L 9	Mallett's point and just making sure, are we using
20	everything that we already have to the fullest of its
21	capability? Is the actual weaponry that you're
22	implying here going to make for a better police
23	department, for better relationship between community

24

25

and police department? And if that is the case, you

know, the studies also, are there any studies that show

1	that we've been so close because we all have said
2	basically that the community relationship with the
3	police department of this day and age is much better
4	than it was before?
5	How be it, I do think it's somewhat
6	disingenuous to think that it's all because of police
7	department and the community. But largely back in 2001
8	there were a series of investigations indictments done
9	against the police department from the DOJ, which
10	caused their eyes to be upon this which helped to shape
11	our response as far as the police department.
12	However, I would like to say with that
13	question, are we doing the Wile E. Coyote thing here?
14	Are we not using what we have that we all say we have a
15	better police department, community relationship today?
16	Is it something else that we can do with what we
17	already have or is this weaponry going to make that
18	much better for the police department? Thank you.
19	CHAIRMAN BELL: Thank you, sir. I'd like to
20	ask the panel if they can make some brief closing
21	remarks and I'll start in reverse order. Mr. Young
22	would go first.
23	MR. YOUNG: My comment is that the members of
24	the Detroit Police Department are doing an outstanding
25	job. They are doing an outstanding job under very

difficult circumstances. And I would like to remind
the people in the room because you call. And they come
fast. They come hard. They come furious. They don't
come because they're making a donut run or because
they're doing something else. They come because you
need them. Let's not take that for granted.

There's a lot of people that would make a lot of comments and they wouldn't understand. I listen to a lot of people as the president of my union that talk about things and they're not informed. They're not informed decisions. So here's the deal. Sometimes when somebody speaks very quickly, they're the people that needs the very things that they speak against. I think that this is a positive thing for the members of the Detroit Police Department and I'm asking for as much support as possible.

COMMISSIONER BELL: Thank you.

DR. DUNNE: I'd just like to thank everyone for being here and some really great questions. One of the things I think that I feel honored to be asked to be here because I think it is part of the conversation. Every type of weapon has consequences in terms of injury and medical issues. And as they are considered, we should be considering with our eyes open everything we know about all the different options at our

1	disposal, things that are designed to be less lethal,
2	and again, I use that term, not less-than-lethal
3	because it's less lethal I think is the right way to
4	talk about it, and where they fall in that continuum of
5	force all the way up into weapons that if they're used
6	as they were designed, like a firearm, are lethal. So
7	that's something I think we should all just be aware of
8	the consequences.

9 COMMISSIONER BELL: Thank you, Doctor. Mr. 10 White.

2.2

MR. WHITE: First of all, thank you all for having us to come before you again. I'm glad to see such a great turnout from the community.

First, our position is no tasers. We stated that before, but there were a couple things I want clarify. When it talks about Consent Agreement,
Coalition Against Police Brutality, members of Hood
Research and other organizations are the reason why that Consent Agreement was drafted. I think that that's important to say because some of what I heard today, it gives the illusion that all of a sudden with the current administration, things of that nature, that everything is great, but we have to really look at the history on both ends. You've had Matthew Johnson. You had Crawford with his black police officers. You've

2.2

had Ron Scott. You had Ken Cockerel, lawyers, you ha
Justice Raddatz. You've had all types of different
individuals, which is the reason why we're able to si
here today so when we take a look at this when the
community comes forward and says to you that this type
of move draws division and a very wide gap when we're
in the direction of where we're coming together, I
think that needs to be taken into consideration.

And finally, if the only alternative approach has been looked at internally from traveling and everything has been tasers. We have a fiduciary responsibility as a body, members of the Commission to make sure that the whole entire different processes are examined first. And those are some of the things that I see. So right now, just based upon the fact that only, the only decision, the only approach that's made was to take a look at just tasers, that's not a good policy. That's not good managerial, that's not the way that you arrive at any decision. And then that's what I say.

COMMISSIONER BELL: Chief.

CHIEF McKINNON: So, it's interesting for me because for years ago we were having the same discussion at a different level and it was about how do we curb the violence, how do we stop shootings an such.

l	I was one of those people who worked with Justice
2	Raddatz and Ken Cockrel. Ron Scott was a good friend.
3	We talked all the time. He was concerned about things.
4	People didn't know that because I was the Chief and Ron
5	and I would talk.

But these are important things. And so the bottom line is how do we as a community and law enforcement, we're all one big community, how do we stem the tide of violence in whatever we might do?

And so my position is that we have to use the best tools in the best areas possible to make sure that the police are equipped with whatever it might take and hopefully something that's not going to take someone's life, because taking someone's life is certainly the ultimate supreme court decision can do that. We have to make sure that everyone is well equipment, well trained, well trained, well trained, and the people that we bring from the police department have a mentality as such that they're not going to overuse that.

That's one thing that hasn't been talked about here tonight, you know, the selection process is most important to what we want to do. If you don't have the right people in the police department, you can have a Ferguson, a Baltimore, whatever it might be in

2.2

terms of what you're bringing onto this. And as we do
this, start with the selection process and continue
with that training, training. As a police person, we
train what, twice a year the range, twice a year the
range. How often do we train in terms of community
talking, relations and those kind of things. That has
to be emphasized even more. The conscious is here all
over the country.

So my final resolve is as whether it's law enforcement, politicians. Now I'm an educator at the University of Detroit Mercy, I still talk about this. This is a passion for me. Let's continue to educate our community, educate our law enforcement and make sure that families are educating their children.

CHAIRMAN BELL: Thank you, Chief.

MR. FENCER: The concern that we have about tasers is not speculative, even though there aren't any here, there are any number of departments across the state that have a history of abusing things. And the existence of policies governing their use has apparently not made a difference. In one sheriff's department there was an explicit policy, a requirement that officers not use tasers in instances when jailed occupants were engaged is passive resistance. Yet, there's a police report that we have that talks about a

2

25

female jailed inmate who refused to put on her orange
jumpsuit, and when she finally retreated underneath the
bunk and went limp and refused to come out, the
sheriff's deputies decided to us the taser in order to
get her out. So these things happen. We know that
they happen and it's a concern.

But more important that that is the whole question of whether given what's happening in this country, given the relationships between police and community, looking for new weapons is the way to go. There are countries around the world where police to not even carry firearms. Now, I'm not suggesting that that's something that's realistic or feasible here, but there is something that can be learned from them because they make a priority developing productive partnerships with the community. And one police administrator there said that the most effective weapon that our officers have is their mouths, their ability to talk, to develop relationships with the community so that there is never a need for firearms in any practical way. And I think that in terms of the direction, the drift of law enforcement where we as community in partnership with them need to go, it needs to be more in that direction than brining in new devices that are only going to put barriers and create

1	fear and terror among people who could be working with
2	police as opposed to against them.
3	COMMISSIONER BELL: Thank you. I want to
4	thank the panel for a really healthy discussion.
5	That's what we wanted to establish this evening. And I
6	want you to know, this was not driven by Commission or
7	driven by the Department, but it was driven by police
8	officers who were recently promoted to sergeants and
9	lieutenants in terms of dialog with them. They

11

12

13

14

15

16

17

21

22

23

24

25

understand in 2016 the use of deadly force, the use of a weapon and they are concerned. And they wanted us to look at it and also have the public respond. I thought we were obligated and the Commissioners wholeheartedly endorse discussion, an informal discussion, but they are concerned because they are the ones, as Mark Young, when I started my career in 1971 there was very little training in terms of surviving on the city streets. At that time, we were given a nightstick, a nightstick. You know, there was very little training. slapstick. Remember the blackjack? And basically it was about surviving. We responded to the best of our ability in terms of diffusing a situation. And I recall that I was reluctant to give up my 38 caliber,

1	transition.	You kno	w the fir	repower	that we	e are	dealing
2	with in the	city str	eets all	over An	merica.		

2.2

I'm a Viet Nam veteran. I understand being shot at. On my first shooing on this Department, I was not wearing a vest. I had the mentality I didn't need a vest. And survived that shooting, and the perpetrator was shot and killed. I didn't fire my weapon. My last shooting was at Gratiot and Gunston when a young man came in there with a gun and he was able to get it out, and I'm on the desk without a gun, without a vest. I survived that because the officer responded guickly.

Officers, as Mark Young indicated, you know, we know about the military veterans that we're dealing with now with all issues they have come home with and are still dealing with, that is the un-looked issue dealing with policing in America, especially in Detroit. You don't consider the consequence of engaging a shooting or losing a good friend. I lost my classmate, Glenn Smith, the first two years on the job. When I look on that memorial wall, I see several people that I know. You talk about this day and age, you know, but that's the nature of the business that I raise my right hand for. You know, when they leave home, they have no intentions, but we know there are

Page 91

1	bad actors in any professions, any profession, but the
2	bottom line is that it's another tool and putting your
3	hand on your gun, you're offended by that, so be it.
4	That's the reality. Now if I pull the gun, it's a
5	different ball game. But once I pull the trigger, once
6	I fire, it's over. I don't what it takes now. Once it
7	goes out, to whosoever is concerned, that's the impact
8	of a bullet. I know it up close in terms of firepower
9	we used in Viet Nam. I know it's up close to the
10	firepower in the city streets. We see it all the time.
11	People have no qualms. We talk about black-on-black
12	crime, Black Lives Matter. All lives matter, but
13	people are still dying in the City of Detroit. So
14	that's why we want to have this discussion about
15	another tool. We talk about the other tools that we
16	mentioned it casually, but we wanted to focus in on it.
17	So keep that in mind and you can give us
18	feedback. You can contact. There is no one person
19	make a decision. The mayor is not in on this. The
20	Chief is not in on this. The Commission haven't made a

feedback. You can contact. There is no one person make a decision. The mayor is not in on this. The Chief is not in on this. The Commission haven't made a final decision. The council will weigh in on it because they have to budget to pay for it, right? Like we all in for body cameras. Am I right or wrong? We all want body cameras, video cameras. We know the reality that might bring out the truth, but that's not

21

22

23

24

1	the solution. Because we saw Rodney King, people saw
2	something totally different. But we're trying to
3	protect ourself and protect you. While you're running
4	away, police officers are running to the situation.
5	While you're demonstrating, police officers are
6	guarding you for your rights to protest. And we know
7	what is happening in other cities and it hasn't
8	happened here. But the reality is we need to have
9	discussion. If we don't talk about it, then we have
10	issues. So we're trying to flush those issues out.

I'd like to close by getting an idea, if you are in favor would you please stand? If you are in favor of tasers, please stand? Okay. Thank you. If you're in opposition, would you please stand? Thank you. Undecided, would you please stand? Thank you. This is democracy. This is what it's all about and we need your input. You can contact us and give us that type of feedback.

COMMISSIONER MALLETT: I appreciate your passion, Mr. Chairman, on this issue as well. As we go forward, and I really am looking both to the Department and to persons like Sergeant Young who are expert in these areas. What is the problem, Mr. Chairman, that we're trying to solve? I think we really, really, really need to define that for the public so that the

Page 93

1	public is sure that we have thought through the
2	solutions. And because what I think is in front of us,
3	actually, is an opportunity to make a very well
4	thought-out decision, or at least a recommendation as
5	to what the go forward is. But I really would like for
6	you, Mr. Chairman, and you, Sergeant Young, we
7	recognize that the police are in a very very dangerous
8	job and that there are very very significant issues on
9	a daily basis minute by minute that they confront, but
10	I'm really looking for you to not set that aside. If
11	that's a problem and that there is evidence that you
12	want the Commission to have and to understand that in
13	the current circumstances that Police Department is
14	operating in, they don't have the tools that they need
15	to do their job, the Police Commission needs to know
16	that. But if there is, but if that's not the problem
17	that we're trying to solve. And if the only thing
18	Commissioner Dewaelsche says that we want to place in
19	the hands had of the Police Department an alternative
20	to a lethal force, then as Dr. Dunne's indicated,
21	there's just less lethal, there's really not a clear
22	alternative to nonlethal.
23	COMMISSIONER DEWAELSCHE: As an alternative
24	and to save lives.

25

COMMISSIONER MALLETT: So is it then that we

9/8/2016

1	are in a circumstance where we are losing life and
2	that, therefore, this particular tool is necessary? Is
3	that the problem?

4

25

So I really do think, Mr. Chairman, that it would be beneficial if we could just step back a little bit and have the problem that we are discussing, what is it that we're really trying to get to because what we can do is get to where everybody wants this to go, I think.

Page 94

CHAIRMAN BELL: That is correct. I think as we move forward, this is like the first dialog. If we move forward to even attending the NACo Conference this year or end of this month, that as we interact with other oversights in other cities and we're going to get that type of feedback. And naturally want to meet with the experts and the police officers. Police officers, their response to the promotion class was we don't want to be in the position we have to use our weapons. to beat somebody with the nightstick, we don't want to engage in that, and that was why we had that dialog. They want to save lives and save their lives too. So that's how we're going to approach it.

COMMISSIONER DEWAELSCHE: Mr. Chair, I just want to ask a quick question. What is the goal? When do we need to make this decision? What is the Police

Τ.	Department hoping for in terms of our decision:
2	COMMISSIONER BELL: There's nothing on the
3	table. There's no timeframe. I don't think it's going
4	to happen this year. What we're addressing now is body
5	cameras. That's the reality. This is something that
6	we just thought, since it came up, that we thought we
7	would address it. So there's no timetable in terms of

addressing. Commissioner Moore.

2.2

COMMISSIONER MOORE: Just a quick point, Mr. Chairman. I believe it's necessary for you and the community to know that we do have current intermediate weapon which is the equivalent of a taser and it's called pepper spray. That might not be the preferred method that the Department is using, but I don't want anyone to go out here thinking oh, they don't have an intermediate weapon. They do have them. It's probably not one that's liked, but they do have them.

COMMISSIONER BELL: And perhaps in another forum, we can have the Department address those concerns whereas they're utilizing those type of pepper sprays, weapons, whatever they outline that we can have that type available. But as we go forward, there's nothing locked in that we have to do certain things by a certain date, not even on the table. I think this has been a great evening to have this type of dialog

1	and there's no other business, I'd like to thank you.
2	COMMISSIONER CRAWFORD: Mr. Chair?
3	COMMISSIONER BELL: Yes, sir.
4	COMMISSIONER CRAWFORD: I have one quick
5	point or two quick points here. One is tasers, the use
6	of tasers do kill. Secondly, and most importantly, a
7	lot of these if you do some research, the data will
8	show that the abuse by police officers stepping outside
9	of or violating policy and protocol is very high on the
10	results of individual's being killed such as
11	individuals being multi tasered. That's a documented
12	fact which contributes to the death of individuals who
13	were tasered multiple times within, you know, the
14	30-second period or one-minute period, and it can be
15	done by one officer or two or three officers tasing one
16	individual. So that is a fact of officers the abuse
17	and in violating policy. And the young man asked a
18	question in terms of protocol and policy, which
19	occurred, the incident that occurred in Oklahoma two
20	years ago where a businessman who was a deputized
21	deputy in Oklahoma who allegedly well, he shot and
22	killed an individual allegedly reaching for what he had
23	a taser and a gun and he thought he was pulling the
24	taser and, of course, he pulled is gun. Ultimately, he
25	was convicted

1	But again, those types of incidents I think
2	you will find overwhelmingly too that when individuals
3	step outside of training, outside of protocol,
4	violating policy, there's oftentimes it results in
5	death. And even tasering individuals who are
6	handcuffed and they taser them. So and that's what the
7	ACLU attorney spoke to. Thank you.
8	COMMISSIONER DEWAELSCHE: Mr. Chair, if I
9	may, I would also like if we're going to move forward
10	with this to have some data on how many people were not
11	shot, and instead, tasers were used so maybe lives were
12	saved, if we can get that kind of information as well.
13	And I really would recommend that we as a Commission If
14	we're going to talk about this issue and raise the
15	hopes of the Police Department that we may, you know,
16	approve this that we have some kind of a timeline or
17	goal date to make a decision.
18	COMMISSIONER BROOKS: Yes, ma'am. Keep in
19	mind that as the Doctor stated, anything can kill you.
20	You can punch a person with one punch, he might die.
21	You choke I mean a choke hold, how many have died
22	from a choke hold. I can't breath. So the reality
23	that the consequence of any action might lead to your
24	death, you can stumble and fall, I might survive, you

might die. You can take a pill, it might react a

certain way. I survive, you might die. Those	are the
realities, but in law enforcement, this is not	Canada
or in London even police officers not carry gu	n. In
Canada there's no guns for law enforcement, on	ly rare
occasions, right? Somebody mentioned that. We	ell, I
don't think that's reality, so we have to face	reality,
and what we're trying to do is we're trying to	respond.

The key is we want to mention recruiting. If Commissioner Brooks will talk briefly about recruiting, we can close on that note about we're seeking police officers Chief mentioned about hiring.

excellent job in our recruiting, and the recruiting session that was held I think what, yesterday?

Tuesday? There were 94. And so we are steadily recruiting, but I just want to say one thing, I've listened to everything. We seem to dwell on people dying. We need to dwell on people living. That's why we think about new ways, new tools for the Police Department, not about who's black, who's white, who's going to die, but who's going to live. And so while we're recruiting, we're recruiting the best people that we can get because officers nowadays have to have, they have to be trained. And so when you're trained, you will learn how to use a taser if that's what we're

9/8/2016

	Page 99
1	going to do. So let's not forget about the officers
2	and their training and what they have to do in the
3	community and let's not forget about all the programs
4	that are going on in the communities between the Police
5	Department.
6	So the Police Department is hard at work.
7	They're working with all kinds of communities and we
8	are recruiting in all of these communities. So I just
9	wanted to add that little bit that please, let's think
L O	about living, protecting each other, officers
11	protecting themselves, officers policing themselves,
12	and let's talk about, let's talk about dying lesser.
13	Thank you.
L 4	COMMISSIONER BELL: On that note, let's give
15	the panel a round of applause for participating. Give
16	yourselves a round of applause for coming out and thank
L7	you. The Chair will entertain a motion for
L8	adjournment.
L 9	COMMISSIONER MALLETT: So moved.
20	(The proceeding was adjourned at 9:00 p.m.)
