

Hi Audra,

Thank you for calling about our project today. Here is a bullet point list of what we discussed. These are our reasons for wanting to install this new door.

-the current French doors are literally about to rip out of the wall any minute by the hinges. Because of that, we aren't able to use the doors.

-each door has 10 panes of glass. It is very old, non-tempered glass. It's very unsafe for anyone let alone having two small children in the house.

-we opted to go with a sliding door as opposed to French doors because of the energy efficiency that the sliding door will offer. And again, less moving pieces and parts with kids running around.

Thank you!
