

2/15/21

To Historic Commission,

I removed my clay tile roof on 2/13/21. I did not utilize a company/contractor for the removal. I thought I only needed a permit for the new roof and material. After several estimates on replacing the tile roof, I realized I could not afford the cost of doing so. The existing roof was past repair and was leaking into my house, to the second floor. Rotting underlayment and rotting boards and mold were my immediate concerns. I am a single woman, raising my three grandchildren, all under the age of five years old, and their health and well being caused me to remove the existing clay tile roof. In an effort to prevent further damage.

Alexandria Windows, Doors and Metal Roofing is coming to give an estimate on a new metal roof. The style, color and panel details are as follows.

CEDAR METAL SHINGLES

Color - WEATHERED CEDAR

PANEL DETAILS -

Panel exposure 12 x 24

Weight per square - 90 pounds

Product Material - G-90, GALVANIZED STEEL

Fastening Detail - Four-way interlocking panels w/clips for concealed fasteners

The roof comes with a lifetime warranty. I will include a detailed breakdown from the company, once provided.
