

ULTRA-CORRUGATED PANELS

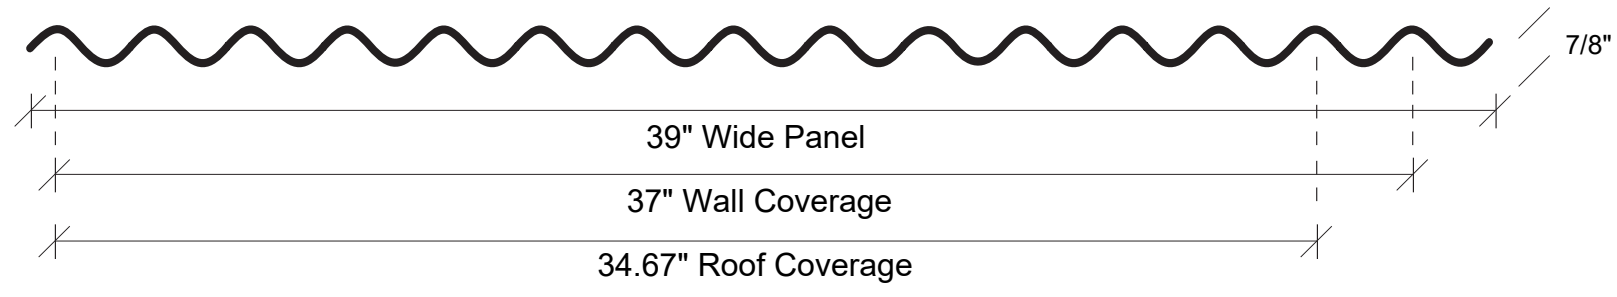

PRODUCT FEATURES

- Attractive architectural profile
- Extraordinary structural stability
- Beautifully designed panel for interior and exterior application
- 2.67" on center rib spacing and 7/8" rib height
- Fast, easy installation using CMG color-matched accessories

Corrugated metal panels are one of the original metal panels used for roofing and siding, and are often revered for their timeless aesthetic. Featuring a repeating sine-wave design, the Ultra-Corrugated panel can be installed vertically or horizontally, providing a highly versatile option for any project.

Ultra-Corrugated is quickly and easily installed with exposed-fasteners over solid substrate or open framing members. Featuring extraordinary structural stability, the Ultra-Corrugated panel is a long-lasting panel designed to weather the elements.

Ultra-Corrugated panels are offered in all CMG standard finishes as well as Bonderized, A606, and Galvalume Plus. Please contact Coated Metals Group for complete test results, load tables and specifications.
