PROJECT DETAILS – TELL US ABOUT YOUR PROJECT

Instructions: Add project details using the text box in each section. If your details exceed the space provided, attach the details via the attachment icon for that section.

ePLANS PERMIT NUMBER:

(only applicable if you've already applied for permits through ePLANS)

N/A

GENERAL

1. DESCRIPTION OF EXISTING CONDITION

Please tell us about the current appearance and conditions of the areas you want to change. You may use a few sentences or attach a separate prepared document on the right. (For example, "existing roof on my garage is covered in gray asphalt shingles in poor condition.")

Existing windows / jambs and frame have been compromised due metal window cages that went in them and have rotten over time.

2. PHOTOGRAPHS

Help us understand your project. Please attach photographs of all areas where work is proposed.

3. DESCRIPTION OF PROJECT

In this box, tell us about what you want to do at the areas described above in box #1. (For example, "Install new asphalt shingle roofing at garage.")

Install new proposed windows

4. DETAILED SCOPE OF WORK

In this box, please describe all steps necessary to complete the work described in box #3. (For example, "remove existing shingles, replace wood deck as necessary, replace wood eaves, install roof vents, replace rotted fascia boards, paint, clean worksite.")

5. BROCHURES/CUT SHEETS

Please provide information on the products or materials you are proposing to install. For example, a brochure on the brand and color of the shingles proposed.

ADDITIONAL DETAILS

6. WINDOWS/DOORS

Detailed photographs of window(s) and/or door(s) proposed for replacement showing the condition of the interior and exterior of the window(s) and/or door(s)

Replacing Existing Windows Reason

In general, the wood has been decaying and rotten from the inside. We found that since we purchased our home, we couldn't open our windows without damaging what was preexisting do to rot. The windows were covered in paint inside and outside to conceal the decay and conditions of our windows and structural sliding frames/ jambs. When I did unlock the sash lock and attempt to force the windows up or down, thereby departing the paint from it, the windows would either slide down and couldn't put back up without hammering, or when putting the window back it would not level with the check rails or the still frame. It was taking effort and work to put back in place and keep it in place and the best thing to do was to fasten the window back with new sash locks. We had to keep locked until we could find someone to repair our windows. The following year 2018 and gravitating towards next door app recommendation I had reached out to various places and due to the scope of my project no one wanted the work or didn't have the employees for the work to maintain the charm & elegance of our home. Just to site a few.

- H&R Window Repair (the most responsive)
- Michigan Historic Windows
- All Season Window Restoration
- Ypsilanti Restoration
- Aruba Home repair and Improvement
- Abatron WPA (where I learned to glazed)
- Pella and many others
- And many others

Reasonable care and safety for my family is why we must replace the windows and not neglect and ignore the window liability of this historic home that has been impose on us because it wasn't cared for by the previous owner or renovators. This house was setup in suites for multiple tenants and we still get there mail today. Far too long trying to get a company to fulfill this restoration journey for me and waiting for opening and slots while risking the safety of my family since 2017 under the constraints I've been given has us in distressed, even more when power is out, always thinking in case of fire. It's time for this born and raised Detroit family to feel safe and enjoy a home we set ourselves in Boston-Edison not just to be enamored with the historic home past, but the future to live the life as those historic families who enjoyed their windows open, light entering their home, and feeling safe in their community, not barricaded. We have not lived safe in this home even after the house was fully renovated, the joy was temporal until this home showed its true condition.

This committee has a shared interest on the outside appearance of historical homes – this has been made known to me, and I really do appreciate this and respect your comment to preservation, and with my first encounter with a preservationist I feel a sense of authenticity and trust. By living in this home and not feeling safe in this home, due to the issues of this home the internal health is essential for the overall well-being of the windows appearance to work together to maintain functionality, ensuring the safety and security of windows is crucial for the well-being of a home exterior and its

occupants. Windows play a vital role in providing natural light, ventilation, and views of the outside community as we all know. We have vulnerable points for potential accidents, proper locking mechanisms, sturdy frames, jambs, and sash. We need new windows to prioritize the safety of windows where a homeowner can create a secure and comfortable living environment for our family and friends. A preservationist asked me what a historical home is? I poorly responded because I didn't know, "A 100-year-old home". I should have said preserving the past, building the future where history lives on in our homes and heart. For years, I couldn't find a company to do the work of a preservationist that we needed and for the choice of windows we wanted to echo the past that would be a legacy for the future where our historic home and family may intertwine. The removed windows will stay on this property out of respect to all while the new windows customized to pay homage and reflect on what was well designed. Richard Moe, a national trust for historic preservation once said, "Preservation is simply having the good sense to hold on to things that are well designed, that link us with our past in a meaningful way, and that have plenty of good use left in them."

The opportunity to address the condition of our windows should have been founded and noted with previous work on Project #PRJ2017-00479 permit #BLD2017-00661 CASE # 2017 00249 when walls were in good faith taken down to the studs and inspected since new electrical wire was put in. All pictures show the rotten post that where just painted over, and the caps fall off those post to the ground with nails attached to them. My plan is to fully restore those post and beams the right way and under the right process by going to this committee first because we do have a shared interest in the outside appearance of this historic home and our loved City that we wish to serve in.

2310 EDISION ST. BOSTON-EDISON

CURRENT PHOTOGRAPHS
Front of property

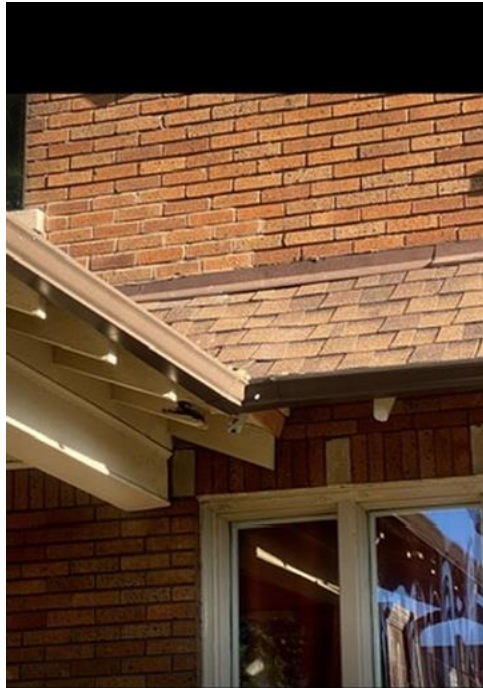

Third floor window

Second floor window

1st floor front

Metal bars. This is the area where we believe carpenter ants base was and going up to the front of the house.

Decay of jamb wood and cracking

Metal bars and not accessible

2ND LEVEL FRONT

jamb walls damaged preventing top window from staying up unless fastened.

2310 EDISION ST. BOSTON-EDISON

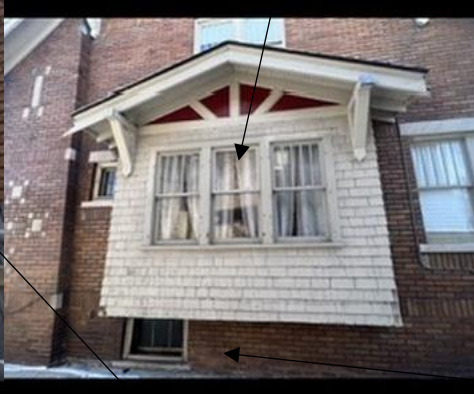

3

1ST LEVEL EAST OF PROPERTY

2310 EDISON ST. BOSTON-EDISON

4

This window was here when we moved in, and nails kept glass in place. Through Abatron (WPA) I learned to glaze the window and repaired it the best I could, but the vertical wood pieces must not have been salvageable by those who renovated the home in 2017.

Basement window bars and not assessable

Windows have to be locked for windows to be leveled.

Window rotten from the bottom of the window.

Jambs/ sash compromised.

Water damaged that has rotted the window jambs over time and effected the sash.

I initially thought this was a glass tinted window, but just recently this year I found out it was a plastic material to where all the water was coming from during harsh rains.

Jambs/sash. I had to hold a wood piece to keep this window from coming down. One night the window came down and the alarm siren off.

BACK OF PROPERTY

Jambs compromised

At one point metal cages were on all windows imbedded in the jambs of the window structure ruining the integrity of the wood over time.

Metal bars and not accessible

WEST OF PROPERTY

Metal bars drilled into the jambs of the window frame

Squirrel biting into the window frame and it's normal to see them in the morning or on rainy days by our two back East and West side of the property.

Our Sister house that we could compliment to make this community a very special place

Materials

- 1. Windows Description and Specs see attachment.**
- 2. Quad Core Foam**
- 3. 1x6 Rough Cedar**
- 4. Aluminum Coil .024 gauge in Tan Color**
- 5. OSI Quad Advanced Sealant in Tan Color**

Detail Scope of Work

- Test existing paint for lead.
- Contain areas.
- Remove existing windows.
- Remove rotten wood from jambs with exception to sill and the existing frame. Preserve and do not replace.
- Screw in new vinyl window level and fasten with screws.
- Install Quad Core Foam Insulation.
- Install custom bent aluminum Coil .024 gauge around the new window to pre-existing window frame covering wood and ending at brick and Stone (trim to exterior).
- Install casing and jambs as needed to the interior.
- Caulk as necessary to make seamless.
- Store Historic windows in Garage.
- Clean up and haul away debris.

Replacing Existing Windows Reason

In general, the windows have not been functional or safe to use. We found that since we purchased our home, we couldn't open our windows without damaging what was preexisting do to rot, fractured wood, or leveled check rails. The windows were covered in paint interior and exterior to conceal the decay and conditions of our windows and structural sliding frames/ jambs. When I did unlock a sash lock and attempt to force the windows up or down, thereby departing the paint from it, the windows would either slide down and I couldn't put back up without hammering, or when putting the window back it would not level with the check rails or the still frame. It was taking effort and work to put back in place and keep it in place and the best thing to do was to fasten the window back with new sash locks that couldn't be level. We had to keep locked until we could find someone to repair our windows. The following year 2018 and gravitating towards next door app recommendation I had reached out to various places and due to the scope of my project no one wanted the work or didn't have the employees for the work to maintain the charm & elegance of our home. Just to site a few.

Reasonable care and safety for my family is why we must replace the windows and not neglect and ignore this great liability that wasn't taken cared of by the previous owners or renovators. This house was setup in suites for multiple tenants and we still get there mail today. Far too long trying to get a company to fulfill this restoration journey for me and waiting for opening and slots while risking the safety of my family since 2017 under the constraints I've been given has me in distress, even more when power is out, always thinking in case of fire. We were born and raised in Detroit and never wanted to leave the city to raise a family. We wanted to move here and create a haven right here in the City where many look down upon. We want to feel safe and enjoy a home we envision we could in Boston-Edison not just to be enamored with the historic home past, but the future to live the life as those historic families who enjoyed their windows open with guest, light entering their home, and feeling safe in their community, not barricaded. We have not lived safe in this home even after the house was fully renovated, the joy was temporal until this home showed its true condition.

This committee has a shared interest on the outside appearance of historical homes – this has been made known to me, and I really do appreciate this and respect

your comment to preservation, and with my first encounter with a preservationist I feel a sense of authenticity and trust. By living in this home and not feeling safe in this home, due to the issues of this home the internal health is essential for the overall well-being of the windows appearance to work together to maintain functionality, ensuring the safety and security of windows is crucial for the well-being of a home exterior and its occupants. Windows play a vital role in providing natural light, ventilation, and views of the outside community as we all know. We have vulnerable points for potential accidents, proper locking mechanisms, sturdy frames, jambs, and sash that not one company we found to be interested. We need new windows to prioritize the safety of windows where a homeowner can create a secure and comfortable living environment for our family and friends. A preservationist asked me what a historical home is? I poorly responded because I didn't know, "A 100-year-old home". I should have said preserving the past, building the future where history lives on in our homes and heart. For years, I couldn't find a company to do the work of a preservationist that we needed and for the choice of windows we selected to echo the past that would be a legacy for the future where our historic home and family may intertwine. The removed windows will stay on this property out of respect to all while the new windows customized to pay homage and reflect on what was well designed. Richard Moe, a national trust for historic preservation once said, "Preservation is simply having the good sense to hold on to things that are well designed, that link us with our past in a meaningful way, and that have plenty of good use left in them."

The opportunity to address the condition of our windows should have been founded and noted with previous work on Project #PRJ2017-00479 permit #BLD2017-00661 CASE # 2017 00249 when walls were in good faith taken down to the studs and inspected since new electrical wire was put in. All pictures show the rotten post that where just painted over, and the caps fail off those post to the ground with nails attached to them shows the plan deterioration that has permeated our exterior home. This is one steppingstone to fully restoring those post and beams like our sister house four houses down from us. This is just to show that we too have a shared interest in the outside appearance of this historic home and a love and appreciation for our city that we serve.

Materials

CURRENT PHOTOGRAPHS
Front of property

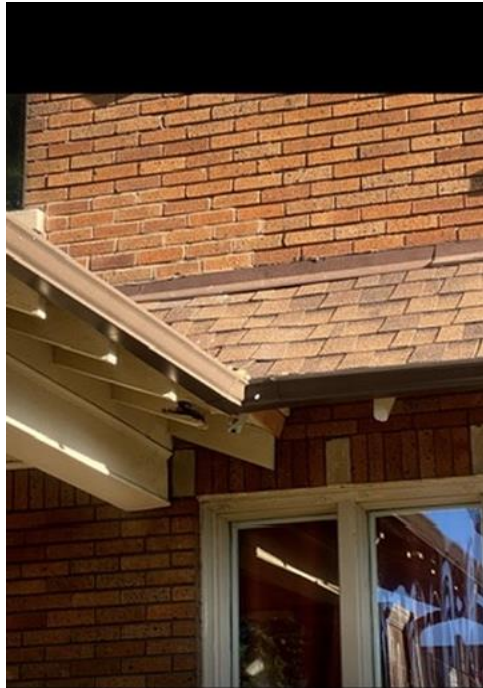

Third floor window

Second floor window

1st floor front

Metal bars. This is the area where we believe carpenter ants base was and going up to the front of the house.

Decay of jamb wood and cracking

Metal bars and not accessible

2ND LEVEL FRONT

jamb walls damaged preventing top window from staying up unless fastened.

2310 EDISION ST. BOSTON-EDISON

3

1ST LEVEL EAST OF PROPERTY

2310 EDISON ST. BOSTON-EDISON

4

This window was here when we moved in, and nails kept glass in place. Through Abatron (WPA) I learned to glaze the window and repaired it the best I could, but the vertical wood pieces must not have been salvageable by those who renovated the home in 2017.

Basement window bars and not assessable

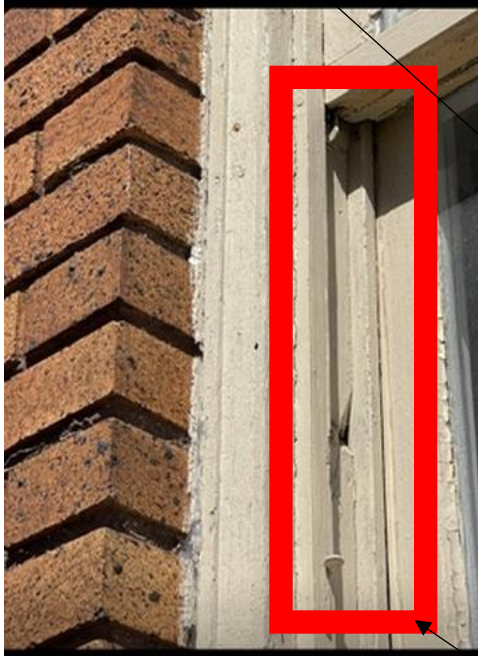

Window rotten from the bottom of the window.

Windows have to be locked for windows to be leveled.

Jambs/ sash compromised.

Water damaged that has rotted the window jambs over time and effected the sash.

I initially thought this was a glass tinted window, but just recently this year I found out it was a plastic material to where all the water was coming from during harsh rains.

Jambs/sash. I had to hold a wood piece to keep this window from coming down. One night the window came down and the alarm siren off.

BACK OF PROPERTY

Jambs compromised

At one point metal cages were on all windows imbedded in the jambs of the window structure ruining the integrity of the wood over time.

Metal bars and not accessible

Metal bars drilled into the jambs of the window frame

Squirrel biting into the window frame and it's normal to see them in the morning or on rainy days by our two back East and West side of the property.

Our Sister house that we could compliment to make this community a very special place

Materials

- 1. Windows Description and Specs see attachment.**
- 2. Quad Core Foam**
- 3. 1x6 Rough Cedar**
- 4. Aluminum Coil .024 gauge in Tan Color**
- 5. OSI Quad Advanced Sealant in Tan Color**

Detail Scope of Work

- Test existing paint for lead.
- Contain areas.
- Remove existing windows.
- Remove rotten wood from jambs with exception to sill and the existing frame. Preserve and do not replace.
- Screw in new vinyl window level and fasten with screws.
- Install Quad Core Foam Insulation.
- Install custom bent aluminum Coil .024 gauge around the new window to pre-existing window frame covering wood and ending at brick and Stone (trim to exterior).
- Install casing and jambs as needed to the interior.
- Caulk as necessary to make seamless.
- Store Historic windows in Garage.
- Clean up and haul away debris.
